TABLE OF CONTENTS

CHANGES IN APPLICATION, ASSIGNING AND TERMINATING FUNCTIONS5

- AFH and UPH Assignment Priority Descriptions Do Not Agree with AR 210-50 (ECP-505)5
- Status History Records Are Being Incorrectly Removed from the Status History Tab Under Certain Scenarios When Amending UPH and AFH Assignments or Revoking a UPH Assignment (ECP-507 and 508) 13
- Entering a Projected Termination Date on the AFH or UPH Assignment Screen after the Initial Assignment Removed Status History Records (ECP-507a)68
- Revoking a UPH Termination in Certain Scenarios Results in Deletion of Status History Records (ECP-508a)85
- Birth Date for Spouse on the Family Grid Is No Longer Required (ECP-509).....103
- Can Not Perform Future Termination for One Service Member When Both are Assigned Housing and Future Termination Script Did Not Work All the Time (ECP-519 and 522).....104
- Incorrect Sort Order for Waiting List (ECP-523) 108
- Incorrect AFH Termination Reason Codes for Secondary Customers (ECP-544) 108

ADDED HANDICAP FUNCTIONALITIES AND REPORTS110

- Add Capability to Identify Handicap Type for AFH Dwelling Units as Well as Identify Amenities with Handicap Features (ECP-529)..... 110
- Add the Capability to Search for Handicap AFH Dwellings as Well as Make Specific Amenity Selections (Handicap or Non-Handicap), if Desired (ECP-530)..... 125
- Add the Ability to Capture Handicap Information on the ACA-201 Customer Housing Application screen and Printout (ECP-531) 141
- Add Ability to Search for Handicap Type and Amenity Selection to the ACA-205 Customer AFH Dwelling Units Screen (ECP-532) 145
- Add New Column “HC” to the ACA-204 Waiting List Sequence Screen as well as the ACA-205 Customer AFH Dwelling Units Screen, Accessed from the Waiting List Sequence Screen (ECP-533)..... 154
- Add Handicap Types to the ACA-446 Off Post Dwelling Unit Maintenance Screen as Well as the Capability to Identify Amenities with Handicap Features (ECP-534)..... 157
- Add the Capability to Search for Handicap Off-Post Listings as Well as Make Specific Amenity Selections (Handicap or Non-Handicap), if Desired (ECP-535)..... 165
- Add the Capability to Search for Handicap Off-Post Listings as Well as Make Specific Amenity Selections (Handicap or Non-Handicap), if Desired, Using the ACA-206 Off Post Listing Search Screen (ECP-536)..... 175
- Add New Column Header of “HC” to Certain AFH Reports in Order to Identify the Handicap Type of an AFH Dwelling (ECP-539)..... 179
- Add “HC” Field to Family Housing Dwelling Detail Printout (ECP-539a)..... 181
- Add “HC” Column to the Off Post Listing by POC/Status Report (ECP-540)..... 182

Add “Handicap Type” to the Off Post Listing Detail Report (ECP-540a).....	183
ADDS AND CHANGES IN INSPECTION FUNCTION	184
Activate Dropdown Menu Choice “Inspection Search” When Performing an Add Function from Any Inspection Search Screen (ECP-502).....	184
Add Capability to Display Any Existing Inspection Record for an Inspector When Conducting an Inspection Search by “Inspector Id” (ECP-503)	187
Non-Inspections Do Not Print on Any Inspection Report (ECP-504).....	189
ADDS AND CHANGES IN DWELLING/FACILITY CODING.....	190
Incorrect Text Descriptions for Acquisition Category Codes 17 and 18 (ECP-506)	190
Add Privatized (RCI) Acquisition Category Codes to HOMES (ECP-512)	193
Tab Switches When Saving Amenity Details (ECP-529a).....	202
Amenity Details Information Did not Display on the ACA-208 Off Post Listing Screen (ECP-537)	202
ADDS AND CHANGES IN REPORTS, PRINTOUTS, AND LISTINGS.....	205
Incorrect Costs on Inventory Listing Printout (ECP-510)	205
No Document Number on Initial Printout of a FOP or OINT Receipt Printed from Either the ACA-682A/B AFH/UPH Receipt Detail Screen (ECP-513).....	212
Generate 1410 Report and Display Orphaned RPICS (ACA-421 AFH Facility Maintenance and ACA-435 UPH Facility Maintenance Screens) (ECP-514 & 514a)	215
Generate 1411 Report (ECP-515).....	230
Detailed Requirements for 1410 & 1411 Reports (ECP 514, 514a, and 515).....	233
Correct BOP1 Report Discrepancies (ECP-516)	240
Re-format the BOP1 Report and Add Additional Information (ECP-516a)	241
Correct BOP2 Report Discrepancies (ECP-517)	245
Re-format the BOP2 Report and Add Additional Information (ECP-517a)	246
Correct BOP3 Report Discrepancies (ECP-518)	250
Re-format BOP3, Page One, and Sort by Army and Non-Army (ECP-518a).....	250
Provide a Report Similar to BOP1 for Privatized (RCI) Housing (ECP-526).....	255
Provide a Report Similar to BOP2 for Privatized (RCI) Housing (ECP-527).....	259
Provide a Report Similar to BOP3 for Privatized (RCI) Housing (ECP-528).....	262
Reformat Off Post Listing Summary Report So Amenity Information Does not Overlay (ECP-538)	264
MISCELLANEOUS CHANGES	264
Update the Table, “DL_Military_Pay_Grade”, Within HOMES (ECP-520).....	264
De-activate the Dropdown Menu Choice “Delivery Schedule” for Contractor Issues and Turn-ins (ECP-521)	265

Add “ARLOC” and “Facility No.” to Database Table (ECP-542).....	266
Upgrade to Windows 2000 (ECP-524).....	266
Military Equivalencies for Some NAF and Wage Grades is Incorrect (ECP-525)	267
Add New Rollup Descriptions to CTA Table (ECP-541)	268
Section 508 Remediation (ECP-543).....	269
INDEX BY ECP NUMBER	270

CHANGES IN APPLICATION, ASSIGNING AND TERMINATING FUNCTIONS

AFH and UPH Assignment Priority Descriptions Do Not Agree with AR 210-50 (ECP-505)

1 Key personnel (military and civilian)
2 Eligible Army personnel assigned to installation
3 Eligible military personnel of all services w/o logistic support agreements
4 Unaccompanied families of eligible military personnel who currently occupy family housing
5 Military personnel (E1-E3) of all services assigned to the installation
6 Military personnel (E1-E3) of all services in area of installation

*Required Fields
FOR OFFICIAL USE ONLY
PRIVACY ACT DATA

Next =>

The above screen shows AFH assignment priorities within version 12.01.

What follows are the updated AFH assignment priorities within version 12.02.

AFH

1. Key and essential military and civilian personnel
2. Authorized assigned/attached military and civilian personnel (IAW AR 210-50, Table 3-3)
3. Army personnel not assigned to installation but assigned outside one hour commuting (Housing support agreement required)
4. Other Services military personnel (Include 32 USC AGR personnel assigned or attached for duty within one hour commuting distance)
5. Other personnel with support agreements (Foreign or allied military/special projects/nonmilitary Public Health Service/National Oceanic and Atmospheric Administration/Coast Guard)
6. In CONUS, unaccompanied families of military personnel

The above screen shows UPH assignment priorities within version 12.01.

What follows are the updated assignment priorities within version 12.02.

UPH

1. Key and essential military and civilian personnel
2. Permanent party personnel assigned/attached to installation including PCS students receiving BAH at “without dependent” rate/unaccompanied civilian, OCONUS/family restricted tour personnel/unaccompanied personnel serving “all others tour” (excluding Hawaii and Alaska)
3. Permanent party unaccompanied personnel receiving BAH at the “with dependent” rate for support of family members due to divorce or separation (court ordered decree or OSJA separation agreement) or with legally supported family members, for example, children or parents
4. Service members in CONUS, Hawaii, Alaska or U.S. territories receiving BAH at the “with dependent” rate but not accompanied by family members for personal reason (i.e., “geographical bachelor”)
5. Title 32 Active Guard Reserve/foreign military personnel
6. Military and civilian personnel not otherwise eligible

As a result of these changes, some customers with 12.01 assignment priorities will now have to be mapped to the updated 12.02 assignment priorities, as applicable. The mapping changes are as follows:

AFH Assignment Priority Mapping	
<u>Existing #</u>	<u>New #</u>
1	(no change)
2	(no change, but ensure that civilians fall into #2 except existing civilians with an assignment priority of 1)
3	4
4	6
5	2
6	4

UPH Assignment Priority Mapping	
<u>Existing #</u>	<u>New #</u>
1	(no change)
2	(no change)
3	2
4	(no change)
5	(no change)
6	(no change)

TRAINING ISSUE

Because the updated text descriptions are too long to appear next to each assignment priority, a change was required. Text descriptions will no longer display next to each assignment priority. To see the text associated with an assignment priority, you must click on the field “**Assignment Priority**”. This field is now underlined and blue in color to indicate a “hyperlink” to the screen showing the text associated with the assignment priority.

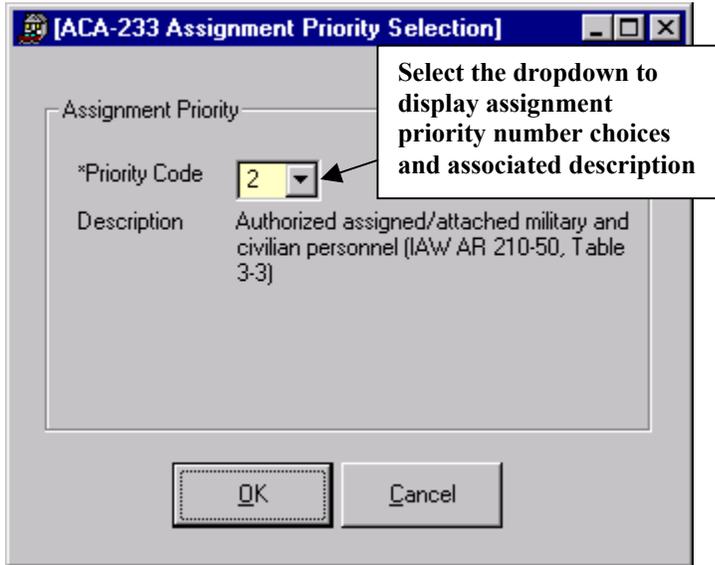

The field “Assignment Priority” in version 12.02 is underlined and blue in color to let you know it is now “hyperlinked” to a new screen showing the text description for the assignment priority number recorded.

Text descriptions associated to each assignment priority no longer display as part of the dropdown field in version 12.02

*Required Fields
FOR OFFICIAL USE ONLY
PRIVACY ACT DATA

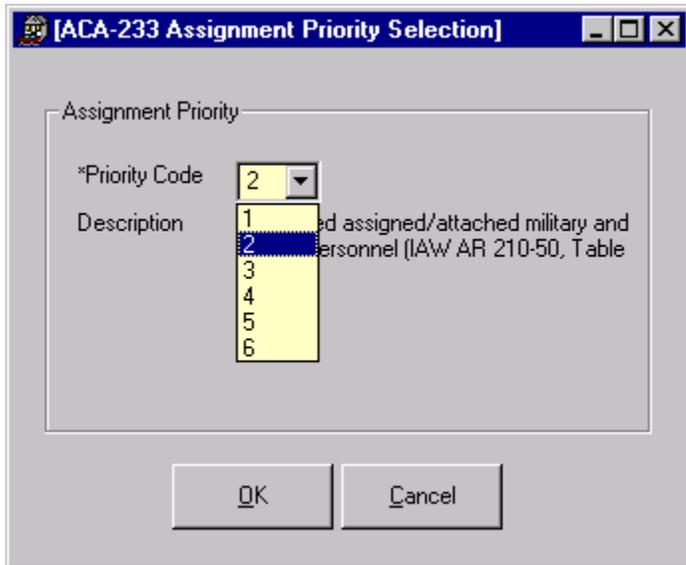

NOTE: The default value for the assignment priority remains as “2” just as it was in version 12.01.

The following new screen appears when you click on the text for the field “**Assignment Priority**”.

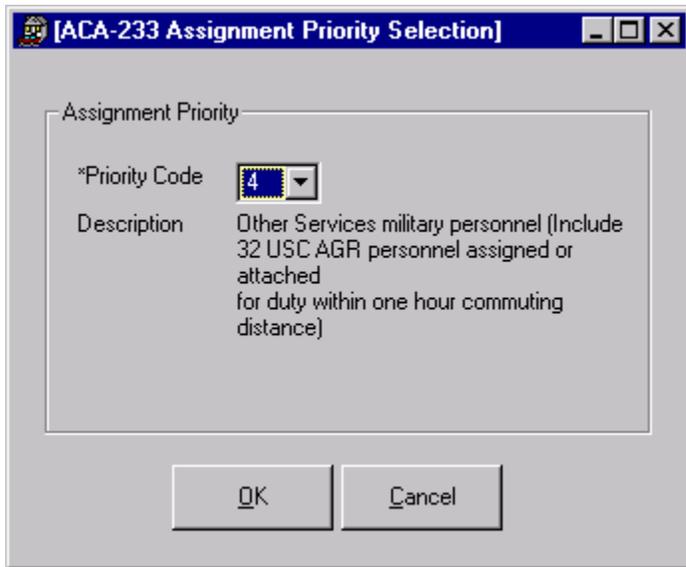

TRAINING ISSUE:

To change the priority code using the new ACA-233 **Assignment Priority Selection** screen, select the dropdown.

The above is an example of what the screen looks like once you have selected the “**Priority Code**” dropdown. (The highlighted number is the value recorded on the ACA-201 **Customer Housing Application** screen.)

To change the assignment priority, select the desired number.

Once you have selected another assignment priority number, the “**Description**” text changes to reflect the text associated with the new assignment priority selection.

If you select the **Cancel** button, the ACA-201 **Customer Housing Application** screen re-appears with the original assignment priority number still present.

To accept the assignment priority change, select the **OK** button. (The ACA-201 screen re-appears with the new assignment priority selected displayed in the “**Assignment Priority**” field.)

The new assignment priority selection functionality has also been added to the ACA-212 **Customer Waiting List Details** screen **Assignment Priority** tab.

The functionality is the same as outlined for the field “**Assignment Priority**” on the ACA-201 **Customer Housing Application** screen. Click on “**New Priority**” to display the new ACA-234 **Assignment Priority Selection** screen.

Again, the assignment priority code displayed is the value shown on the ACA-212 screen. To change the assignment priority, select the dropdown to display the choices. Once a choice has been selected, the “**Description**” text now displays for this choice.

Selecting the **Cancel** button aborts back to the ACA-212 **Customer Waiting List Details** screen with no change in the assignment priority.

Selecting the **OK** button results in the ACA-212 screen re-appearing with the selected assignment priority displayed.

Status History Records Are Being Incorrectly Removed from the Status History Tab Under Certain Scenarios When Amending UPH and AFH Assignments or Revoking a UPH Assignment (ECP-507 and 508)

NOTE: Within version 12.02, assignment revocations no longer are recorded on the **Status History** tab for both UPH and AFH. As part of the deployment, a special script is run to remove old revocation records. Use the report under the **Reports** menu, **Miscellaneous** dropdown menu choice, then the selection “**Memo for F/A Office**” for assignments that have been revoked.

Buchanan, Jill M	173-56-4962	SSG	05757-00B	06-MAY-2002	Assignment Amendment

Assignments that have been revoked are recorded on this report as:
“Assignment Revocation”

Use the above report to check for assignment revocations.

In version 12.01 under certain scenarios, creating, amending or revoking a UPH assignment order caused Status History records to be inadvertently removed from the **Status History** tab. The scenarios causing UPH data to be removed from the UPH Status History tab occurred if:

- 1) You assigned a new customer and entered their assignment date as a date earlier than the assignment date of the previously assigned customer. For example, the most recent assignment record is 7 May 2002. The assignment date for the next customer assigned is entered as 5 May 2002. The 5 May 2002 assignment causes the 7 May 2002 assignment to no longer appear on the Status History tab.
- 2) You amended the assignment date of the latest customer (first record on the Status History tab) to a date earlier than an earlier assignment record. For example, the Status History reflects the most recent assignment record as 6 May 2002. The next assignment record is 1 May 2002. You then amend the 6 May 2002 assignment date to 30 Apr 2002. As a result of the amendment, the 1 May 2002 assignment record gets removed from the Status History tab.
- 3) You amended the assignment date of the second most recent assignment record to a date earlier than the original assignment. This causes the latest or most recent assignment record to be deleted. For example, you have one customer with an assignment date of 6 May 2002 and another with an assignment date of 1 May 2002. If you amend the assignment date of the 1 May assignment record to a date earlier than 6 May 2002, the 6 May 2002 assignment record gets removed from the Status History tab.
- 4) Two UPH customers are assigned with different assignment dates (for example one is assigned 1 May 2002 and the other 7 May 2002) and you go back and revoke a previous assignment (for example, the 1 May 2002 assignment). The result is the assignment record gets removed from the Status History tab (in this example, the 7 May 2002 assignment record gets removed). If the customer whose assignment was revoked was E5 or higher, the UPH dwelling was reflected as “**Available**” instead of “**Occupied**”.

This same problem also occurred when amending an AFH assignment order. However, it only removed a service member to service member reversal transaction if you amended the assignment date to a date earlier than the reversal transaction.

(See the pages that follow addressing each scenario where UPH Status History records are being removed in the 12.01 database.)

SCENARIO ONE (12.01 Database, UPH Status History Record Incorrectly Deleted)

Entering an assignment date of a second UPH customer assigned to a UPH dwelling with an assignment date earlier than the most recent assignment record causes the most recent assignment record to be removed from the Status History tab.

Amenities General Info Furnishings Restrictions **Status History** Inspections Lease

Status	Effective Date	# Days	Name	Rank	Pay Grade	Remarks
0	29-APR-2002		Ervin, Crystal L	SPC	E04	Assigned to Dwelling
0	28-APR-2002	1	Borden, Kimberly N	PV1	E01	Assigned to Dwelling

Version 12.02 Database

*Required Fields Add Delete Save Cancel Close Dwelling 5 of 29

Screen showing that assigning a UPH customer with an assignment date earlier than the latest assignment record does not remove the assignment record. In this scenario, Ervin was the initial assignment record with an assignment date of 29 Apr 2002. When Borden was assigned 28 Apr 2002, the record is placed correctly on the Status History tab without deleting the other assignment record.

SCENARIO TWO (12.02 Database) – Amend UPH Assignment

A new customer is assigned to a UPH dwelling and is the only customer assigned. Another customer is assigned with an assignment date later than the first assignment. The last assigned customer's assignment order is amended to a date earlier than the other customer assigned. (In version 12.01, the assignment record of the customer whose assignment was not amended gets removed from the Status History tab.)

Screen example showing the reversal transaction of 8 May 2002 did not get removed in version 12.02 as a result of amending the assignment record of both service members. Also, the amended assignment date gets recorded in version 12.02 whereas in version 12.01, the amended assignment date was not being recorded.

Memorandum for Finance and Accounting Office showing the assignment was amended.

Entering a Projected Termination Date on the AFH or UPH Assignment Screen after the Initial Assignment Removed Status History Records (ECP-507a)

When an initial assignment record was completed, the assignment screen exited and a “**Projected Termination Date**” entered later on the applicable assignment screen, this caused records to be deleted from the Status History tab.

UPH SCENARIO (12.01 Database) – Recording a projected termination date on the ACA-219 **UPH Dwelling Assignment** screen after the initial assignment record is saved and the screen exited causes the latest assignment record to be deleted from the Status History tab.

Revoking a UPH Termination in Certain Scenarios Results in Deletion of Status History Records (ECP-508a)

NOTE: Within version 12.02, termination revocations no longer are recorded on the Status History tab for both UPH and AFH. As part of the deployment, a special script is run to remove old revocation records. Use the report under the **Reports** menu, **Miscellaneous** dropdown menu choice, then the selection “**Memo for F/A Office**” for terminations that have been revoked.

UPH TERMINATION REVOCATION, 12.02 DATABASE

The following screen examples are used to show the revoking of a UPH termination no longer removes Status History assignment records.

NOTE: If no assignment or assignments have occurred since the original termination but there are dwelling status changes (such as maintenance, available, etc.), the changes in the dwelling status appear on the Status History tab. When you revoke the termination, these types of Status History records are removed as a result of the revocation. Therefore, caution should always be used before revoking a termination record.

Screen showing that revoking Anger's termination record no longer removes Status History records.

UPH TRAINING ISSUE

When revoking a UPH termination, the program checks to ensure:

- 1) There is no space conflict
- 2) There is no gender conflict
- 3) There are no restriction conflicts

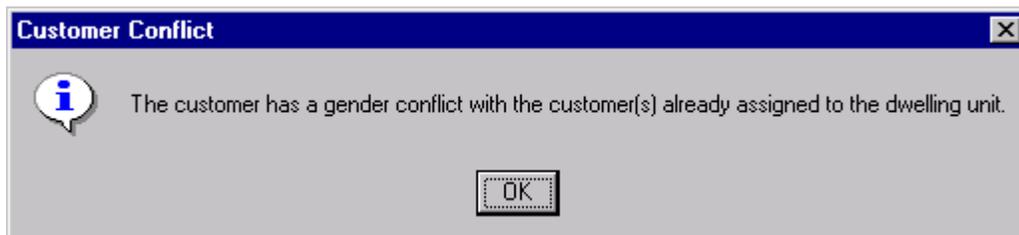

NOTE: The restriction conflicts would be applicable if after the customer was terminated, restrictions were established for the UPH dwelling.

The following is a new message box that appears when revoking a UPH termination and the system finds a space conflict.

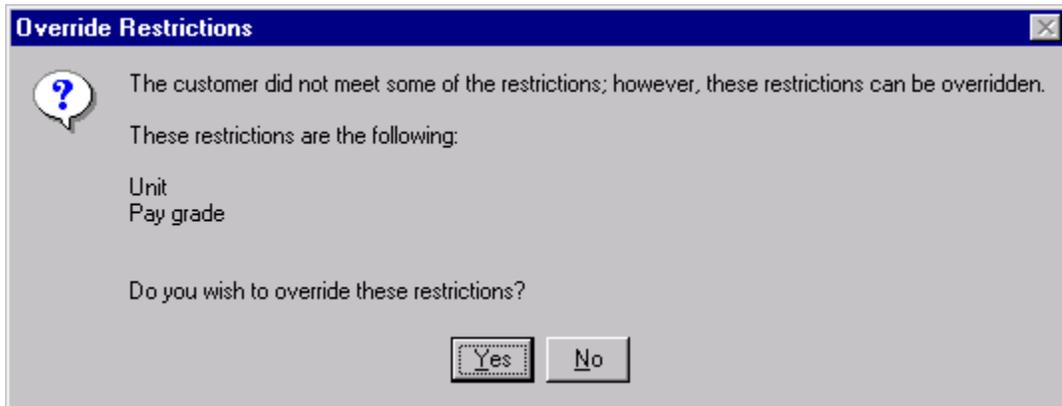

Select “**Yes**” to continue with the revocation. When “**No**” is selected, the termination is not revoked.

The following new message appears when revoking a UPH termination and the system finds there is a gender conflict with one or more customers currently assigned. The system will not allow the termination to be revoked. You must resolve the gender conflict before the termination can be revoked. (Select **OK** to continue)

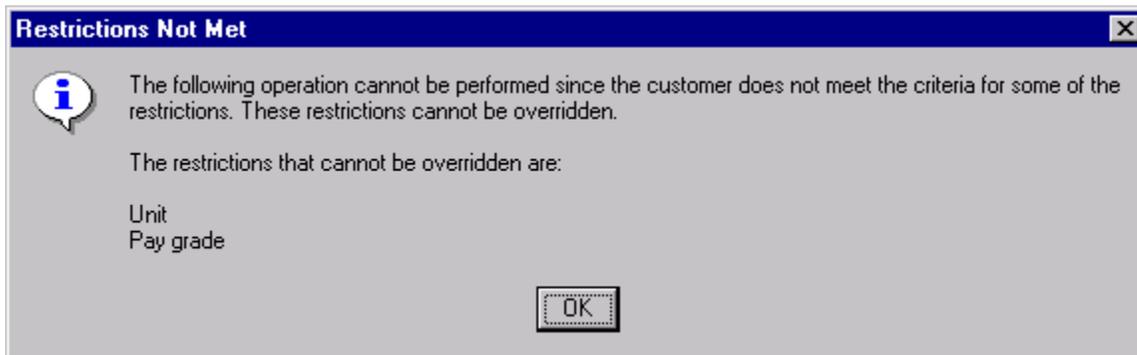

The following new message appears when revoking a UPH termination and the system finds there are restriction conflicts that can be overridden.

Select “**Yes**” to override the restriction(s) and revoke the termination or “**No**” to not override the restriction(s) and not revoke the termination.

The following new message appears when revoking a UPH termination and the system finds there are restrictions that cannot be overridden.

Select **OK** to continue. (The termination is not revoked)

NOTE: Before the termination can be revoked, the customer must either match the applicable restriction or the restriction must be removed.

In addition to fixing the problems where records were being incorrectly deleted from the Status History tab, the version 12.02 change package will also restore the records that had previously been deleted if determined the record is not invalid (for example, pre-version 11.00 database migration record).

Spreadsheets will be generated to show the following:

- Assignments Inserted
- Terminations Inserted
- Revocations Deleted
- Assignment Anomalies
- Termination Anomalies
- Revocation Anomalies
- Status Mismatch

The spreadsheet “**Assignments Inserted**” is an Excel spreadsheet showing what assignment records were restored back on the applicable Status History tab. What follows is an example of what the spreadsheet looks like.

The screenshot shows a Microsoft Excel window titled 'Microsoft Excel - FTKnox_Migr_507_508.xls'. The spreadsheet is titled 'Assignments_Inserted' and contains a table with the following data:

RPIC	Cd	Hsg	DU_Id	Qtrs_Id	Stat	C_Id	Assigned	Terminated	Prim	MS	Customer_Name	A_Id
A21405	A1	F	4018	09033-00H	O	1004742	Dec 1 2001		True	M	Albrecht, Kevin	1004540

*Required Fields Add Delete Save Cancel Close Dwelling 8 of 8

NOTE: The above screen example shows an assignment record restored to the Status History tab as well as a reversal transaction. Use the spreadsheets and go to the applicable dwelling units to see that the applicable records were restored. For records restored, you will see the word “Unit” at the end of the text description to help distinguish normal transaction records from those restored.

The spreadsheet “**Terminations Inserted**” is an Excel spreadsheet showing the termination records that were restored on the applicable Status History tab. The record inserted on the Status History tab reads, “**Terminated from dwelling unit**”.

The spreadsheet “**Revocations Deleted**” is an Excel spreadsheet showing the revocation records that were deleted from the database.

The spreadsheet “**Assignment Anomalies**” is an Excel spreadsheet showing assignment history records that could not be reconciled with other data associated to the status history of a particular dwelling unit or which involve an assignment date prior to the version 11.00 migration date for the site in question. What follows is an example of what the spreadsheet looks like.

RPIC	Cd	Hsg	DU Id	Qtrs Id	Stat	C Id	Assigned	Terminated	Prim	MS	Customer Name	A Id

The spreadsheet “**Termination Anomalies**” is an Excel spreadsheet showing termination history records that could not be reconciled with other data associated to the status history of a particular dwelling unit or which involve an assignment date prior to the version 11.00 migration date for the site in question.

The spreadsheet “**Revocation Anomalies**” is an Excel spreadsheet showing revocation history records not deleted from the status history of a particular dwelling unit because they could not be connected with a record for the revoke transaction (assignment or termination) being revoked.

The spreadsheet “**Status Mismatch**” is an Excel spreadsheet showing the dwelling units for which the current dwelling status and the latest dwelling history status do not correspond. There are several possible causes for this anomaly. If there are records in this spreadsheet, please contact the Help Desk and provide them with information on the specific dwelling units listed. The HOMES database team will then correct the problems and send notification that the corrections have been made.

TRAINING ISSUE

When two service members are assigned AFH and the primary customer is terminated due to “Leaving the Service”, the secondary is made the primary and the primary is then recorded as the spouse on the family grid. In this scenario, the primary customer’s housing status is recorded as “D”. The below message displays under the scenario described.

The above screen shows the primary is recorded with a “Housing Status” of “D” (Discharged Spouse) and has been “flagged for deletion”.

When the primary customer is terminated and the secondary remains assigned to AFH, the secondary becomes the new primary and the former primary is moved to the “family grid”.

If you attempt to revoke the termination of the former primary, the following new message box appears.

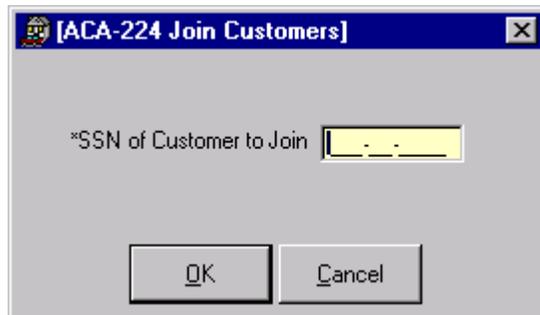

From a programming standpoint the basis for this message is it would have taken months to develop functionality to cover this situation. Due to time constraints, the decision was to have the user contact the Help Desk and the Help Desk would walk the user through the steps required in order to successfully revoke the termination. Also, the steps must be performed in the correct order or further complications could result.

The manual procedures that must be performed in order to revoke the termination of a discharge spouse (former primary only) are as follows:

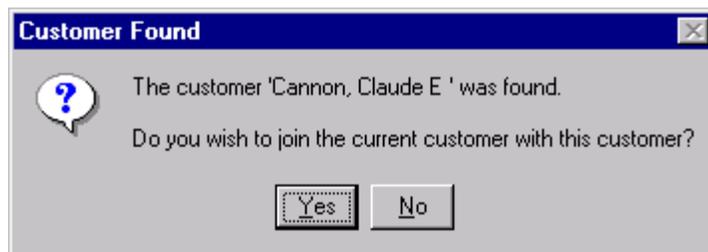

- 1) Undelete the application record of the discharged primary customer (Must be performed from the ACA-201 Customer Housing Application screen). This results in the “Housing Status” changing from “D” (Discharged Spouse) to “O” (Open).
- 2) Next, change this “Marital Status” from “M” to “B”, enter “N” in the “Accompanied” field, “U” in the “Housing Type” field, record the SSN of the customer and then perform a **Save** function. Exit back to the ACA-200 Customer

Search screen. Search for the record of the new primary (former secondary) customer.

- 3) Access the application record of the new primary. Remove the former primary (recorded as Spouse) from the family grid, change the new primary's marital status to "**B**" and perform a **Save** function.
- 4) Select the menu bar choice **Actions**, then the dropdown menu choice "**Join Customers**". (The ACA-224 **Join Customers** screen displays)

- 5) Enter the SSN of the former primary and select the **OK** button.

(Verify the customer displayed is the correct customer. Select the "**Yes**" button to continue or "**No**" to not continue.)

After selecting the "**Yes**" button, activate the **Family** tab. (The former primary should now appear in the **Military Spouse (Secondary)** section of the **Family** tab.)

(See screen example, next page)

The birth date of the spouse is no longer required in version 12.02

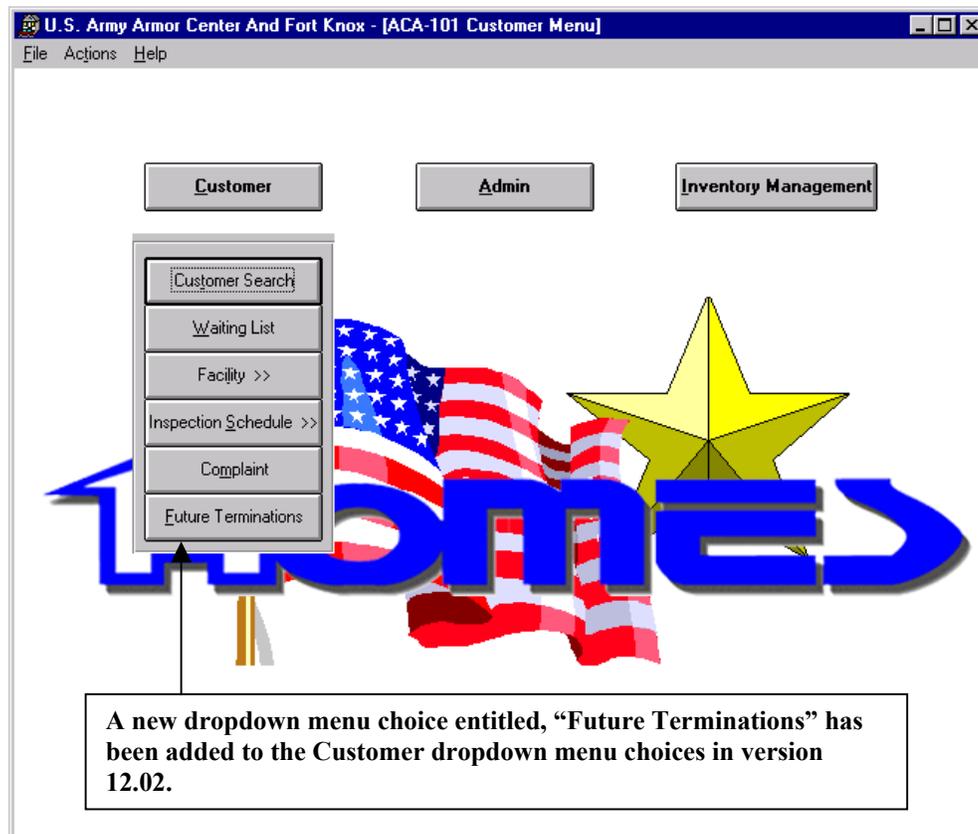

The birth date of the spouse is no longer required but optional.

NOTE: For customers in version 12.01 with birth dates recorded, you can now delete the birth date.

Can Not Perform Future Termination for One Service Member When Both are Assigned Housing and Future Termination Script Did Not Work All the Time (ECP-519 and 522)

Within version 12.01, a “future termination” could not be performed to one service member when both were assigned. You either had to terminate both and then re-assign the one not being terminated or wait until the actual termination date to terminate the customer instead of processing them as a “future termination”. Within version 12.02, you can either terminate the primary, the secondary or both as “future terminations”.

Another problem in version 12.01 is the “future termination” script would at times not work. This has also been fixed in version 12.02. In addition to this fix, a new screen has been added so users can search for projected, successful and failed “future terminations”. A new dropdown menu choice of “**Future Terminations**” has been added to the **Customer** dropdown menu. (See screen example)

Selection of the new menu choice results in the following new screen.

U.S. Army Armor Center And Fort Knox - [ACA-561 Future Termination Search]

File Print Help

Hsg Type	Termination Date	Facility Id	Qtrs Id	Customer SSN	Customer Name	Address	Primary
New screen added in version 12.02							

Search Clear Close

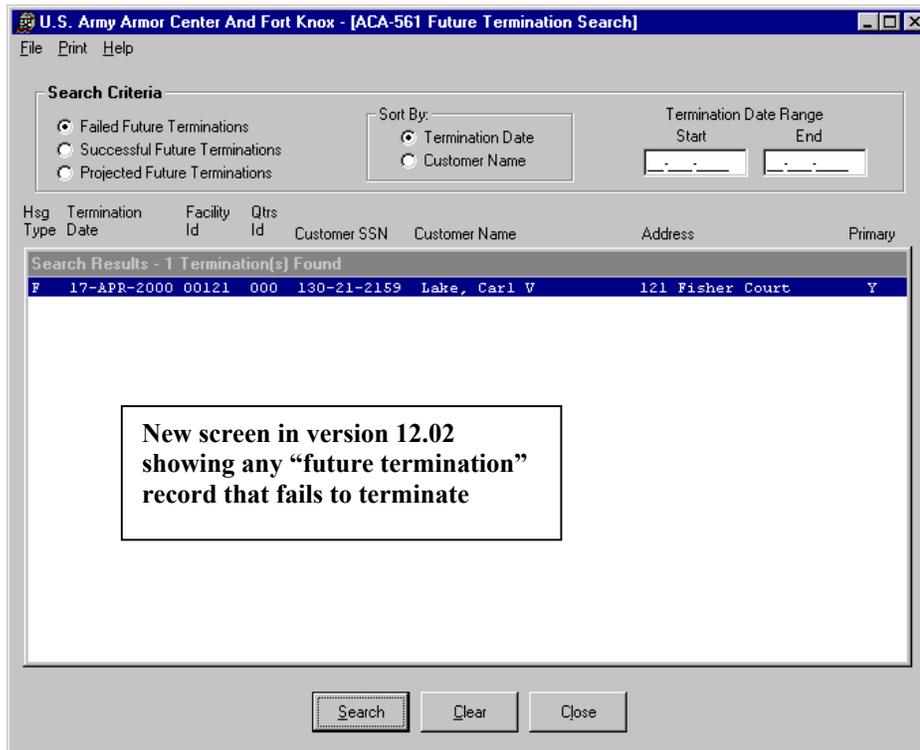

You may search for future terminations by:

- Failed Future Terminations
- Successful Future Terminations
- Projected Future Terminations

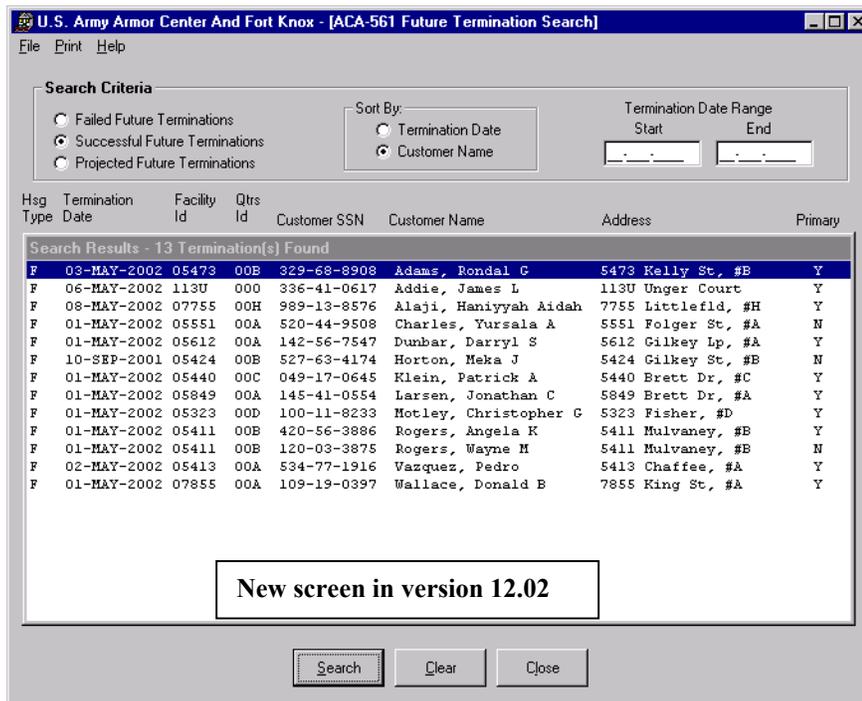

Upon entering ACA-561 **Future Termination Search** screen, the default for searching for future termination is “**Failed Future Terminations**”.

Addition search criteria includes the capability to sort by either “**Termination Date**” or “**Customer Name**” as well as the capability to enter a date range (**Start and End**).

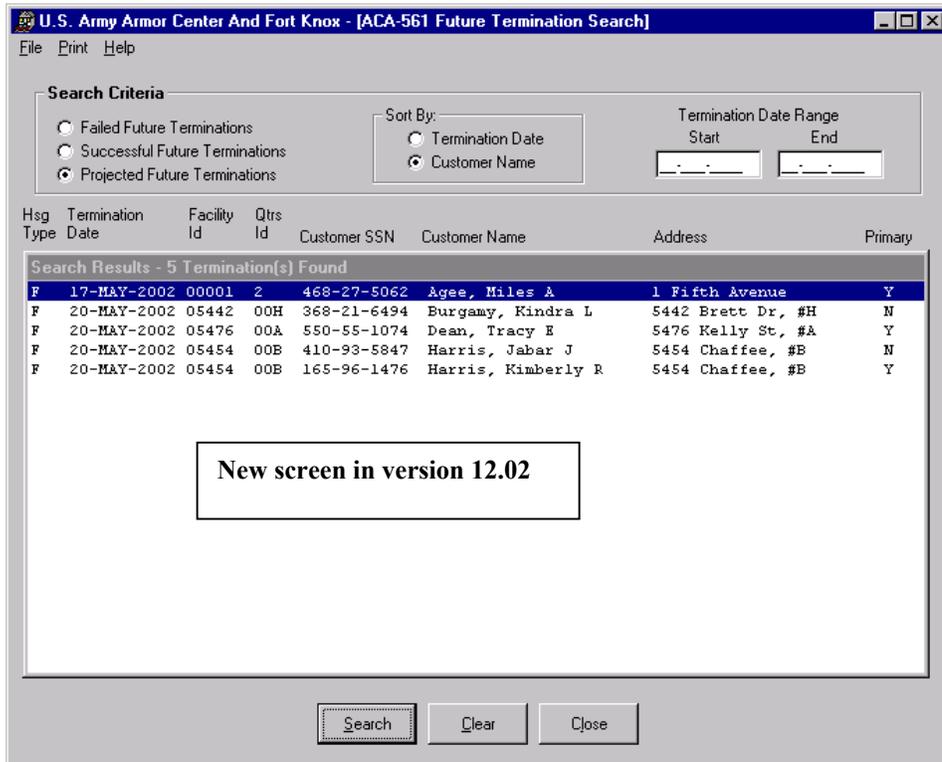

The following screen example shows a failed “future termination”.

The following is an example of the new screen in version 12.02 showing “future termination” records that were successful.

The following is a screen example showing “future terminations” projected to take place in the future.

NOTE: To print the Search Results, select the menu bar choice Print, then the menu choice Search Results.

TRAINING ISSUES

When the primary is terminated as a result of a “future termination” and the secondary is not terminated, the furnishings associated to the primary transfer to the new primary. This also applies to any open furnishings request documents.

Once the primary has been terminated, the “**Current Use Cat**” field on the ACA-422 AFH **Dwelling Unit Maintenance** screen will change to the match the new primary.

When a primary is terminated as a “future termination” and they were on a waiting list, the system will automatically delete them from any waiting list(s) assigned when terminated due to either “**Leaving the Service**” or “**Permanent Change of Station**”.

Any “**Outstanding**” or “**Accepted**” offers for the primary terminated as a “future termination” will automatically be updated to “**Rejected**”.

A dwelling unit cannot be “frozen” if there is a “future termination” record until after the customer has been terminated.

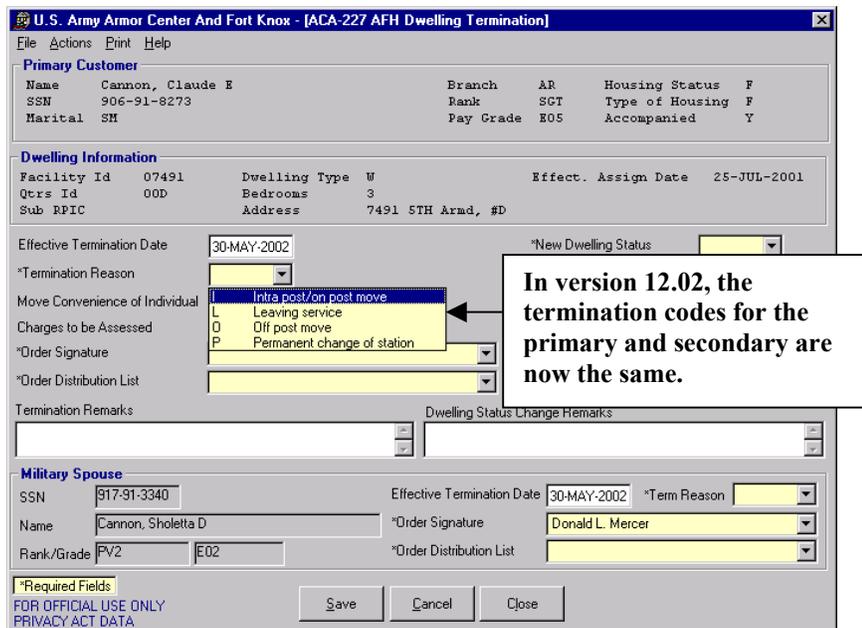

Incorrect Sort Order for Waiting List (ECP-523)

Within version 12.01, the sort criteria, “**Eligibility Status**”, is used as one the sort criteria for determining a customer’s position on a waiting list. As result, civilians were placed on a waiting list ahead of military personnel instead of competing equally. Additionally, “**Eligibility Status**” is not defined in AR 210-50 as a factor used to determine a customer’s waiting list position.

Within version 12.02, “**Eligibility Status**” has been removed as part of the sort criteria for a waiting list. Now, civilian customers compete equally with military customers for their position on a waiting list.

Incorrect AFH Termination Reason Codes for Secondary Customers (ECP-544)

In version 12.01, the termination codes for a secondary customer did not match the same termination codes for the primary customer. In version 12.02, the termination codes are now the same for both the primary and secondary.

ADDED HANDICAP FUNCTIONALITIES AND REPORTS

Add Capability to Identify Handicap Type for AFH Dwelling Units as Well as Identify Amenities with Handicap Features (ECP-529)

In version 12.02, the checkbox entitled, “**Handicap Equipped**”, on the **ACA-422 AFH Dwelling Unit Maintenance** screen has been replaced with a field entitled, “**Handicap Type**”. It is a dropdown field with the following values:

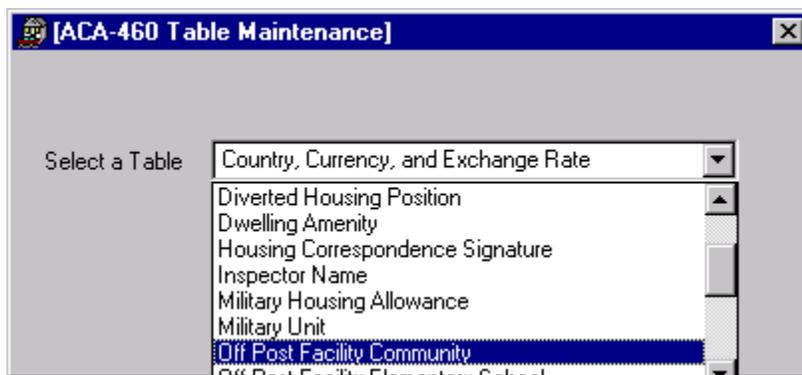

- C – Constructed
- M – Modified
- N – Non-Handicap

NOTE: When version 12.02 is deployed, an “N” will be recorded automatically for all AFH dwelling units currently not checked as “**Handicap Equipped**”. For dwelling units in the 12.01 database with this checkbox checked, these dwellings will be migrated with “M” (Modified). This was done to prevent from having to go to each dwelling unit and manually changing all dwellings, one by one. If the handicap dwellings you have were constructed with handicap features and not modified, you will have to change those from “M” to “C” (Constructed) manually.

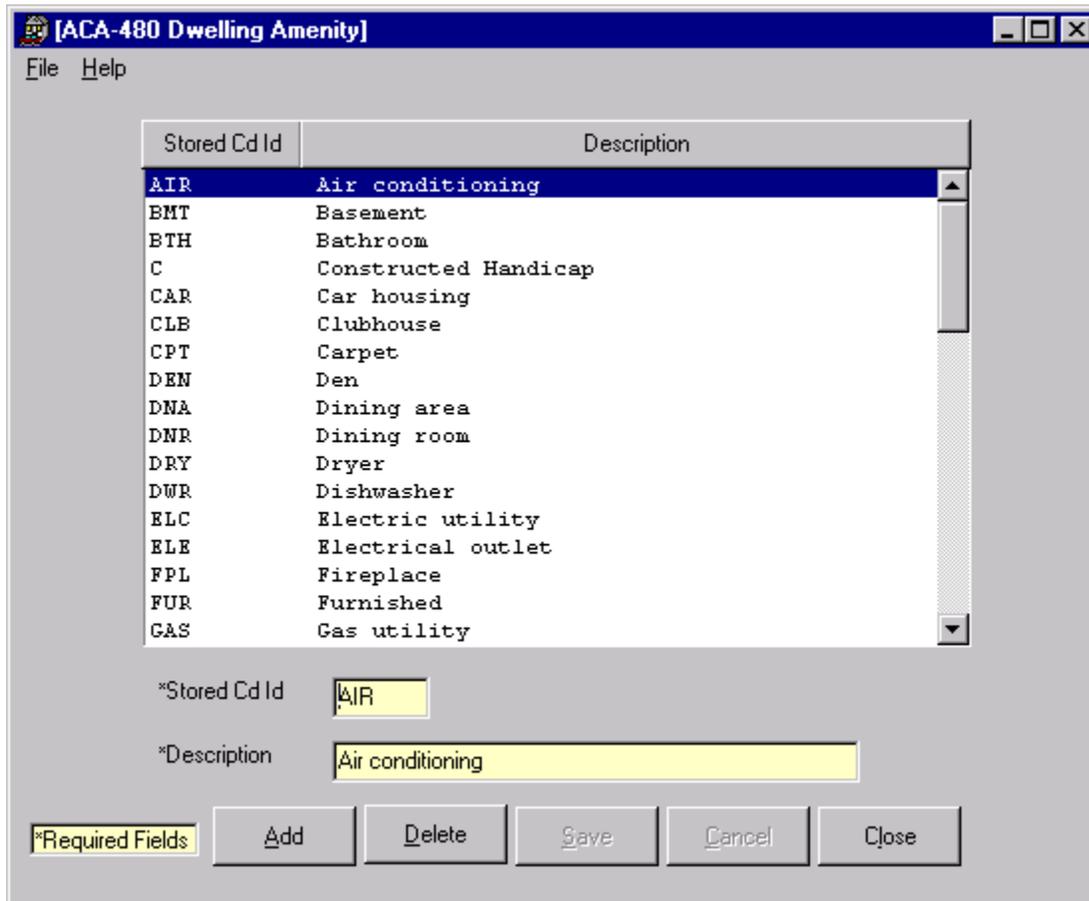

If you have AFH dwellings with handicap features, you must use the **Amenities** tab to establish what amenities, if applicable, are associated with a handicap feature.

NOTE: It is not required, but you can use the “**Dwelling Amenity**” function within **Table Maintenance** to establish specific handicap amenities. The only problem with using this feature is the stored code is three alpha characters and you may run out of combinations.

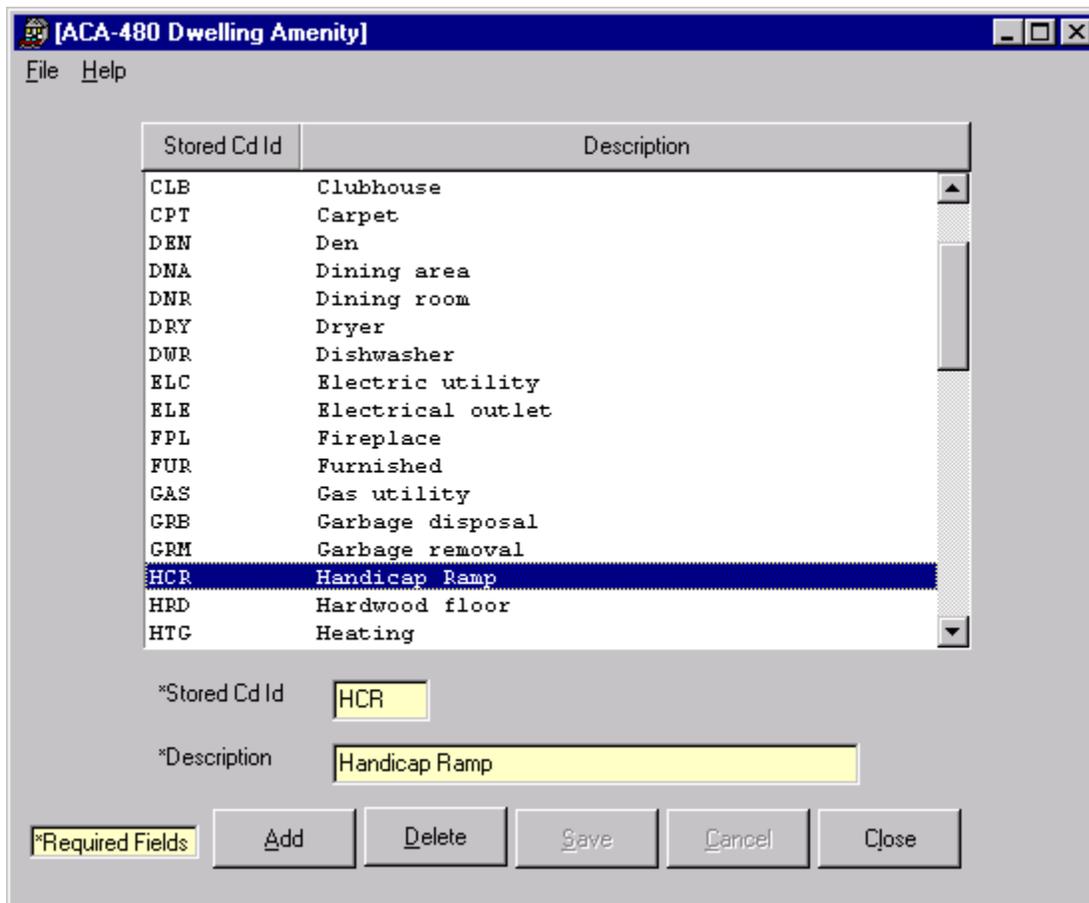

The following example is used to illustrate using the “**Dwelling Amenity**” function within **Table Maintenance** to establish a particular handicap amenity.

Using the **ACA-460 Table Maintenance** screen, select “**Dwelling Amenity**” and then the **OK** button. (The **ACA-480 Dwelling Amenity** screen displays) See the example on the next page.

This is an example of the ACA-480 **Dwelling Amenity** screen. Select the **Add** button to add a new amenity. (The fields “**Stored Cd Id**” and “**Description**” are activated as required fields. Enter the applicable code, description and then perform a **Save** function. (See the screen example, next page)

The screen above shows an amenity with a code of “**HCR**” and a description of “**Handicap Ramp**” was added. Perform a **Close** function to exit. Go to any ACA-422 AFH Dwelling Unit Maintenance screen, review the **Amenities** tab and verify the dwelling amenity you added appears. (See the next page for an example of the scenario created for illustration purposes.)

Dwelling 2 of 2

REMINDER: Before an amenity can be identified as a “**Handicap Feature**”, the field “**Handicap Type**” on the ACA-422 AFH Dwelling Unit Maintenance screen must be either “**M**” or “**C**”. If you attempt to add a “**Handicap Feature**” to an “**Assigned Amenity/Utility**” with a “**Handicap Type**” of “**N**”, the following message displays.

If this message appears, select **OK** and comply with these instructions.

The following screens shows the “**Handicap Type**” has been changed to “**M**”.

To associate “**Handicap Feature**” to a particular amenity, perform the following steps:

- 1) Highlight the “**Available Amenity/Utility**” to be assigned to the dwelling.
- 2) Click on the “arrow button” pointing to the right (see screen example). Item now appears within the section “**Assigned Amenities/Utilities**”. (See screen example next page)

Handicap Ramp: HC

“HC” behind the amenity lets you now the amenity is now recognized by the system as a handicap feature

*Required Fields Add Delete Save Cancel Close Dwelling 2 of 2

The above screen shows that the amenity “**Handicap Ramp**” has now been identified as a “**Handicap Feature**” and can now be searched upon when looking for a dwelling unit with a handicap ramp.

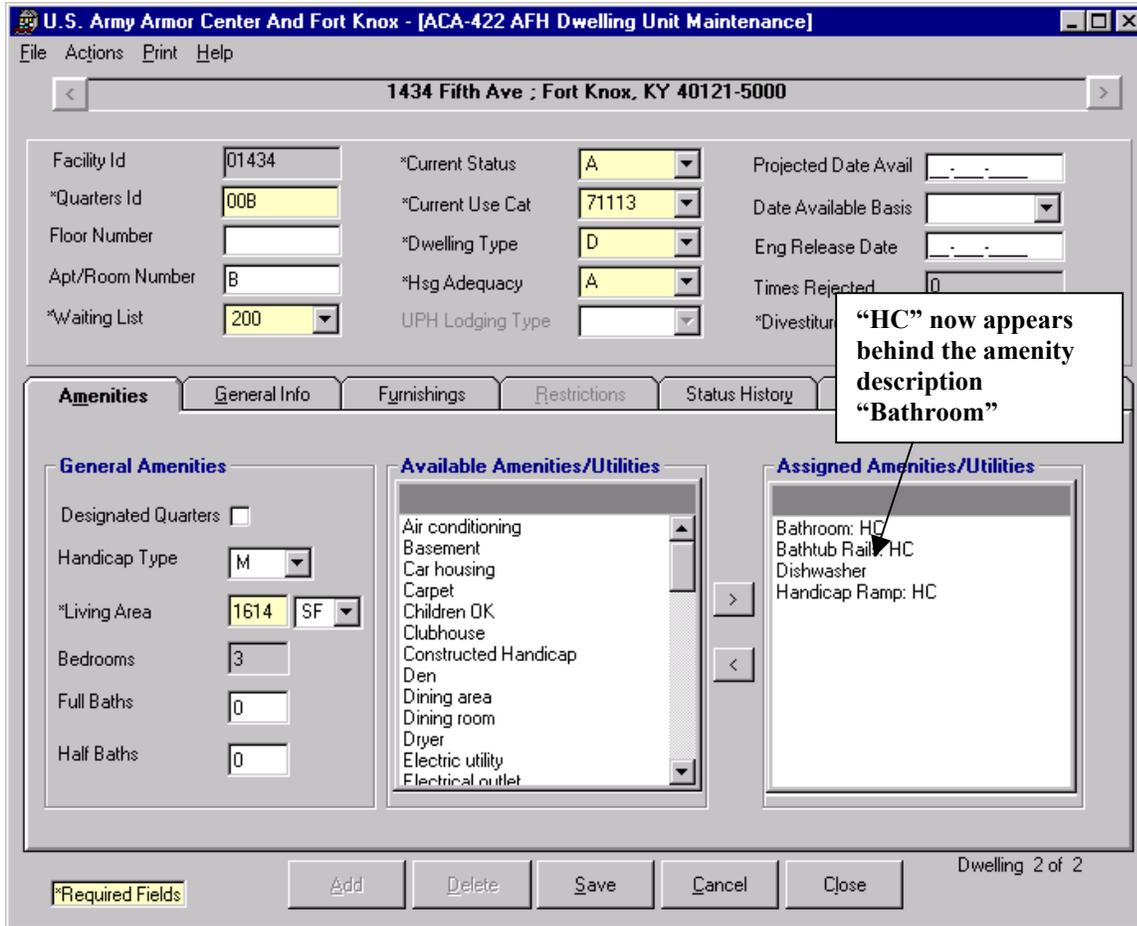

Perform a **Save** function to save the handicap indicator.

The following screen example is used to show that you are not required to add new amenities to your database in order to identify a handicap amenity. You can take an existing amenity and associate it with a “**Handicap Feature**”.

Using the above screen example, the amenity “Bathroom” will be assigned and identified as a “**Handicap Feature**”. The steps are:

- 1) Highlight the amenity
- 2) Click the right arrow button
- 3) Double click on the amenity after it has been moved from the left side of the screen to the right side. (The ACA-429 **Amenity Detail** screen displays)
- 4) Click on the checkbox entitled, “**Handicap Feature**”, then select the **OK** button. (The ACA-429 screen goes away and “**HC**” now appears behind the amenity to indicate a “handicap feature” that can now be used to search upon.)

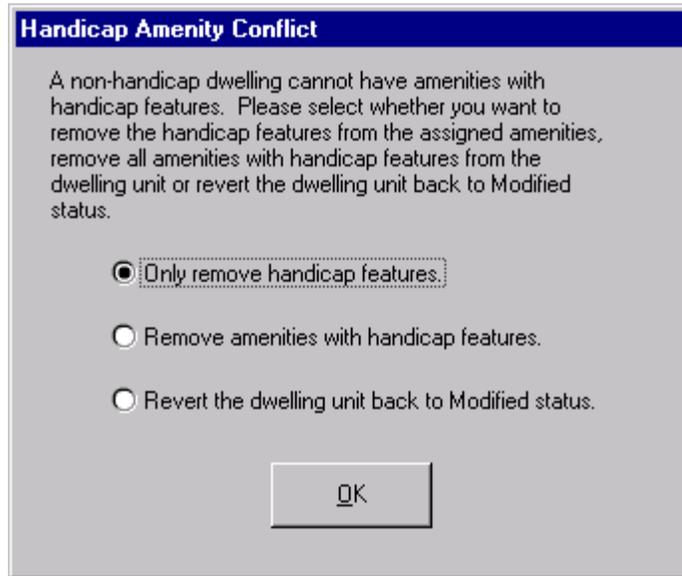

See the next screen showing the “**HC**” behind the assigned amenity.

Perform a **Save** function to save the handicap feature of “HC” behind the applicable amenity or amenities.

CHANGING THE HANDICAP TYPE OF A DWELLING UNIT WITH HANDICAP FEATURES TO NON-HANDICAP

The application software will not allow the handicap type to be changed to “N” (Non-Handicap) if there are amenities with handicap features associated to the AFH dwelling. If you attempt to perform a **Save** function, the following message displays.

You must select one of the radio button choices.

NOTE: If the dwelling unit was previously identified with a “**Handicap Type**” of “**C**” (Constructed), the radio button choice three would read, “**Revert the dwelling unit back to Constructed status.**”

Selection of the first radio button removes the “**HC**” from those amenity descriptions with an “**HC**” behind the description.

Selection of the second radio button removes all items with the “**HC**” from the “**Assigned Amenities/Utilities**” portion and the amenity description goes back to the “**Available Amenities/Utilities**” section.

The screen above shows that the “assigned amenity” of “Bathroom” has “HC” to indicate a “handicap feature”. As noted earlier when you try to convert a handicap dwelling to non-handicap, the message box comes up telling you this can only be done if you remove either the “handicap feature” or remove both the “handicap feature” and amenity from the “Assigned Amenities/Utilities” section. (See next screen)

In this example, only the “handicap features” (HC) are to be removed. The actual amenity remains under the “Assigned Amenities/Utilities” section.

In this example, the amenity “**Bathroom**” remains assigned to the dwelling but the “**HC**” behind “**Bathroom**” is no longer present.

ALTERNATIVE METHOD TO REMOVE AN AMENITY HANDICAP FEATURE INDICATOR

The following example is used to illustrate another method of removing the “HC” from an “assigned” amenity description.

The screen example shows “HC” behind “Bathroom”. To remove it, double click on the amenity. (The ACA-429 **Amenity Detail** screen displays)

[ACA-429 Amenity Detail]

Bathroom

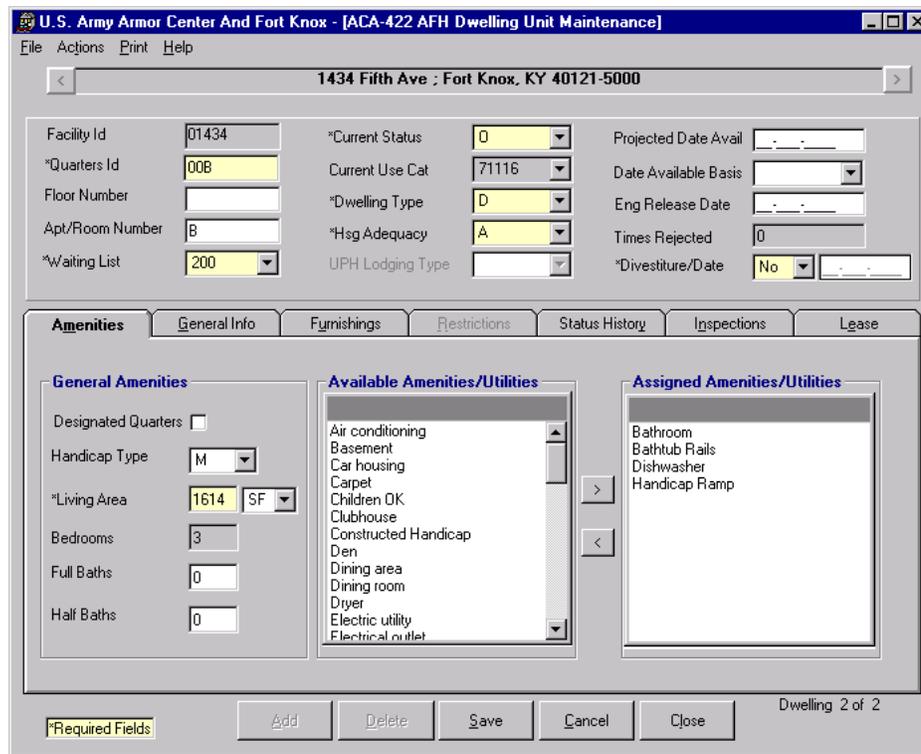

Handicap Feature

OK

Click on the checkbox with the “X”.

The “X” goes away. Select **OK**.

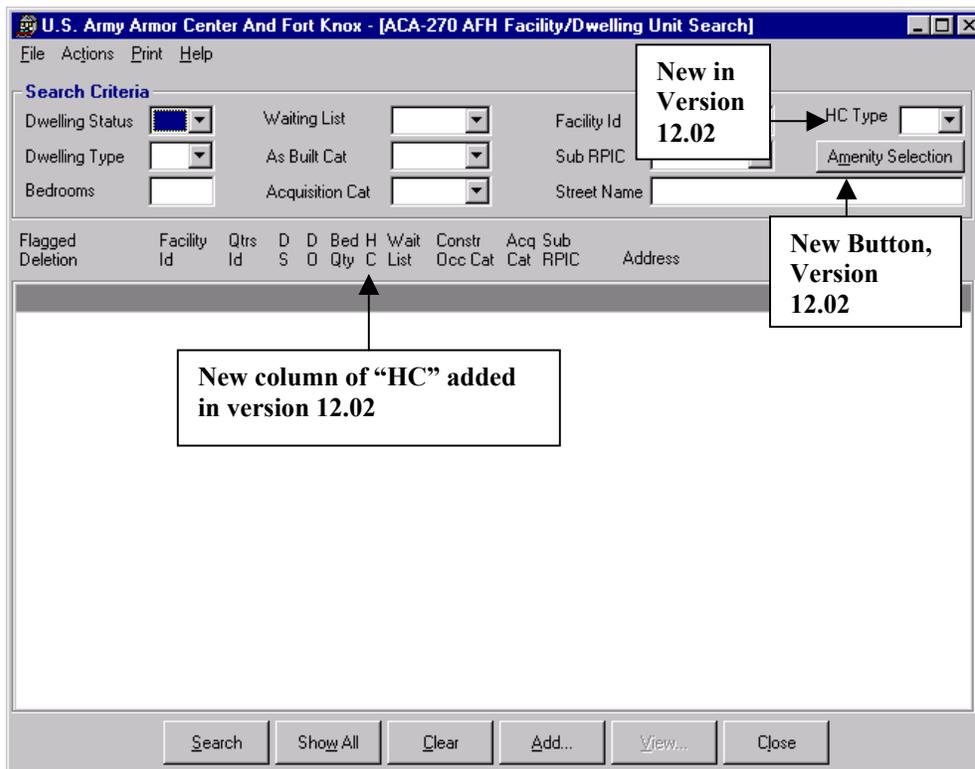

As illustrated by the screen, the “**HC**” no longer appears behind the amenity description of “Bathroom”.

Add the Capability to Search for Handicap AFH Dwellings as Well as Make Specific Amenity Selections (Handicap or Non-Handicap), if Desired (ECP-530)

The ability to search for handicap AFH dwellings has been added to the AFH Search screens. In addition to this capability, you will now be able to search for a specific handicap feature and/or dwelling amenity, if desired.

REMINDER: See ECP 529 instructions related to establishing handicap features. This must be done before you can search for handicap features.

In version 12.02, two new capabilities have been added. One is the ability to search for handicap facilities, if desired or applicable. The second new capability is the ability to select specific amenities (either by handicap feature, non-handicap feature or both). This is accomplished using the button entitled, "**Amenity Selection**".

The dropdown choices for the new search field of "**HC Type**" are:

- Blank Line (Any dwelling unit meeting other search criteria without entering a specific handicap type)
- B – (Both - Constructed or Modified)
- C – Constructed Only
- M – Modified Only
- N – Non-Handicap

USING THE BUTTON AMENITY SELECTION

If you want to look for facilities with specific amenities, you must select the button, “**Amenity Selection**”. If looking for specific handicap amenities, first select the dropdown for the field, “**HC Type**”, and then select “**B**”, “**C**” or “**M**”, as applicable. (The ACA-432 **Dwelling Amenities Selection** screen displays)

At least the Selected Amenities Any of the Selected Amenities

Save Selections Clear All Selections Cancel

The field “**Selected Handicap Type**” lets you know which choice was selected from the field “**HC Type**” on the ACA-270 AFH Facility/Dwelling Unit Search screen.

NOTE: When “**N**” (Non-Handicap) is selected from dropdown choices for the field “**HC Type**”, the “**Handicap Feature**” is not activated. (See screen example)

There are no checkboxes under the column “**Handicap Feature**” whenever the “**HC Type**” selected on the ACA-270 AFH Facility/Dwelling Unit Search screen is “**N**” (Non-Handicap).

USING THE ACA-432 DWELLING AMENITIES SELECTION SCREEN

Selected Handicap Type

Available Amenities	Amenity Choice	Handicap Feature
▶ Air conditioning	<input type="checkbox"/>	<input type="checkbox"/>
Basement	<input type="checkbox"/>	<input type="checkbox"/>
Bathroom	<input type="checkbox"/>	<input type="checkbox"/>
Bathub Rails	<input type="checkbox"/>	<input type="checkbox"/>
Constructed Handicap	<input type="checkbox"/>	<input type="checkbox"/>
Car housing	<input type="checkbox"/>	<input type="checkbox"/>
Clubhouse	<input type="checkbox"/>	<input type="checkbox"/>
Carpet	<input type="checkbox"/>	<input type="checkbox"/>
Den	<input type="checkbox"/>	<input type="checkbox"/>
Dining area	<input type="checkbox"/>	<input type="checkbox"/>
Dining room	<input type="checkbox"/>	<input type="checkbox"/>
Dryer	<input type="checkbox"/>	<input type="checkbox"/>

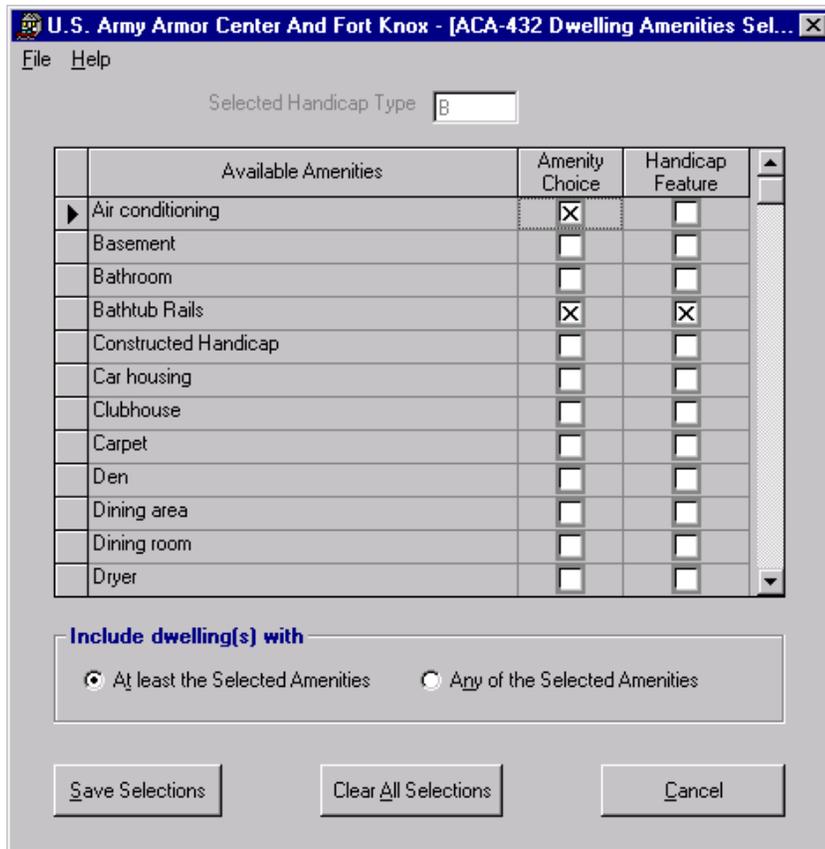

Include dwelling(s) with

At least the Selected Amenities Any of the Selected Amenities

The above screen example shows a “**HC Type**” of “**B**” (Constructed or Modified) was selected on the ACA-270 search screen. In this scenario, you start under the column “**Handicap Feature**” to identify the desired amenities associated with a handicap feature. Scroll through the list and find the desired amenity and then click on the checkbox to activate it and then click again to make your selection under the column “**Handicap Feature**” for the desired amenity.

NOTE: When you make your selection under the column, “**Handicap Feature**”, the box under the column “**Amenity Choice**” is automatically checked. This saves a step so you do not have to click on both boxes. If not looking for an amenity with a handicap feature, click on the box under the “**Amenity Choice**” column.

(See the screen example on the next page illustrating this scenario.)

Using the above screen example, the “**Amenity Choice**” of “Air conditioning” has no association to a “handicap feature”. However, the “Bathtub Rails” does have an association to a “handicap feature”.

Once the amenity selection(s) have been made, the next step is to leave the radio button choice, “**At least the Selected Amenities**”, activated or change to the radio button choice, “**Any of the Selected Amenities**”.

The first selection means that the dwellings searched upon must have all the amenities selected. (If not, the **Search Results** displays, “**0 Records Found**”.)

The second radio button choice means the **Search Results** will return any dwelling unit meeting one or more of the amenity choices.

The button choices on the screen are:

- Save Selections**
- Clear All Selections**
- Cancel**

The **Cancel** button means you want to **Cancel** the amenity selection function and close back to the ACA-270 AFH Facility/Dwelling Unit Search screen.

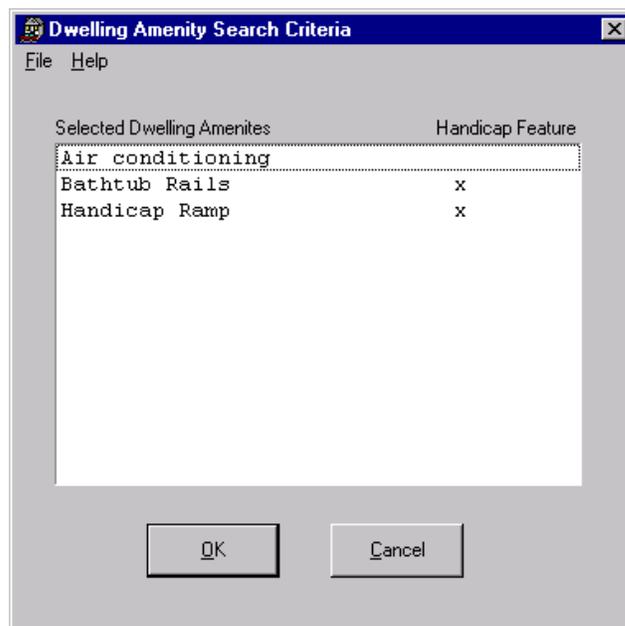

When the **Cancel** button is selected, the following message displays.

(Select, “**Yes**” or “**No**”, as applicable.)

The button choice, “**Clear All Selections**”, will clear any amenity choice(s) selected in order to re-enter selections.

The button choice, “**Save Selections**”, means you are satisfied with your selections and want to proceed. When this button is chosen, the “**Dwelling Amenity Search Criteria**” screen displays. It is a re-cap of exactly what amenity choice(s) you have chosen.

Selecting the **Cancel** button returns you to the ACA-432 **Dwelling Amenities Selection** screen.

Selecting the **OK** button returns you to the ACA-270 AFH Facility/Dwelling Unit Search screen.

TRAINING ISSUE

After returning to the **ACA-270 AFH Facility/Dwelling Unit Search** screen, the button “**Amenity Selection**” appear in *italics* to let you know you have made specific amenity selections. At this stage, you must perform a **Search** function in order to complete the search within the database for the amenities selected.

CAUTION: You may go back and change your amenity selections before you perform the search. However after the search has been performed, you cannot go back and change your amenity selections. Instead, you must perform a “**Clear**” function and start over.

New field "HC" has been added to this report. The applicable code (C, M or N) is recorded for this field

On the "Family Housing Detail" printout, "HC" has been added as a new field to represent "Handicap Type". The value shown is "C" (Constructed), "M" (Modified) or "N" (Non-Handicap), as applicable, and comes from the field "Handicap Type" on the ACA-422 AFH Dwelling Unit Maintenance screen (added as a new field in version 12.02).

Add the Ability to Capture Handicap Information on the ACA-201 Customer Housing Application screen and Printout (ECP-531)

In version 12.02, the capability to capture a “**Handicap Requirement**” has been added.

On the **General** tab, a new checkbox entitled, “**Handicap Requirement**”, has been added within the “**Personal**” section.

The screenshot displays the 'U.S. Army Armor Center And Fort Knox - [ACA-201 Customer Housing Application]' window. The 'General' tab is selected, and the 'Personal' section contains a new checkbox labeled 'Handicap Requirement'. A callout box with the text 'New checkbox added in version 12.02' points to this checkbox. Other sections include 'Application Date and Time' (with fields for date and time), 'Unit/Duty' (with fields for UIC, Unit Name, Duty Phone, Duty Station, and Position), 'Rank/BPED' (with fields for BPED and Rank Date), and 'Current Address' (with fields for Street Nbr, Street Name, Apt/Room Nbr, PO Box, APO, City, State, ZIP Code, and Country). The bottom of the screen features a 'Required Fields' section, a 'FOR OFFICIAL USE ONLY PRIVACY ACT DATA' notice, and navigation buttons: 'Add', 'Delete', 'Save', 'Cancel', 'Close', '<= Previous', and 'Next =>'. A 'Waiting List' table is visible in the top right corner.

When the “**Handicap Requirement**” checkbox is checked, specific information should be recorded on the **Remarks** tab concerning details about the handicap requirement.

Screen example showing handicap remarks have been recorded.

NOTE: You must highlight the **Remarks Type** of “**Handicap Info**” to record as well as see what handicap information has been recorded.

Screen example showing page two of the “Customer Housing Application” has handicap information recorded.

Add Ability to Search for Handicap Type and Amenity Selection to the ACA-205 Customer AFH Dwelling Units Screen (ECP-532)

The ability to perform a search for AFH dwelling units with handicap features has been added to the ACA-205 **Customer AFH Dwelling Units** screen. Within the **Search Results**, there is a new column header of “**HC**”. Under this column either “**N**” (Non-Handicap), “**C**” (Contracted) or “**M**” displays based on what was recorded in the field “**Handicap Type**” on the ACA-422 **AFH Dwelling Unit Maintenance** screen. The following is an example of new ACA-205 screen in version 12.02.

**FOR OFFICIAL USE ONLY
PRIVACY ACT DATA**

[Search] [Show All] [Clear] [View...] [Offer...] [Assign...] [Close]

NOTE: If the checkbox entitled, “**Handicap Requirement**”, on the ACA-201 **Customer Housing Application** screen, **General** tab, **Personal** section is checked, handicap dwelling units meeting the customer’s eligibility requirements display at the top of the dwelling units displayed.

(See screen example next page which illustrates this feature.)

The above screen illustrates that when the “**Handicap Requirement**” checkbox on the ACA-201 **Customer Housing Application** screen has been checked, those dwelling units identified as handicap and meeting the customer’s eligibility display at the top of the list of dwellings displayed. (The basis for this is so you don’t have to scroll through the list of dwellings in order to find a handicap dwelling, when needed.)

NOTE: Handicap dwellings are not excluded for customer’s having no handicap requirement. Dwellings displayed are based on a “first come, first serve basis”. If you do not want clerks assigning handicap dwellings to customers with no handicap requirement, this becomes a training issue at your site.

[A “C” or “M” under the column “HC” now identifies dwellings as being constructed (“C”) or modified (“M”) with handicap features.]

TRAINING ISSUE

When you know there are handicap dwellings available but the customer does not meet eligibility requirements, you must perform a **Clear** function and perform a **Search** function for handicap dwellings. The following screen example illustrates what you need to do.

Search Show All Clear View... Offer... Assign... Close

If you want to see what “handicap feature” or features are associated to the dwelling, highlight the record and then select the “View” button.

This screen now shows the handicap dwellings that did not display initially because the customer did not meet the eligibility requirements for these dwelling units.

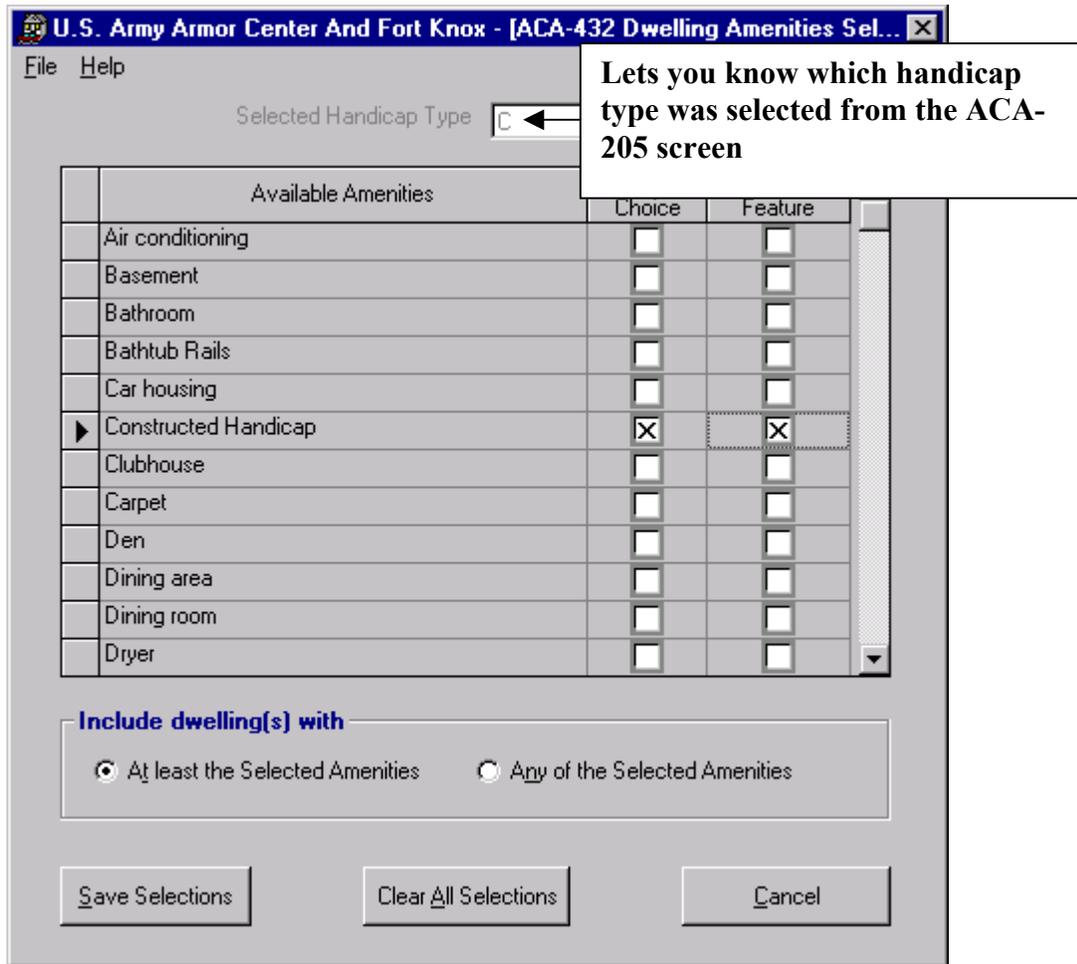

REMINDER: The see exactly what handicap feature or features are associated to a particular dwelling, highlight the record and then select the **View** button.
 (See screen example, next page)

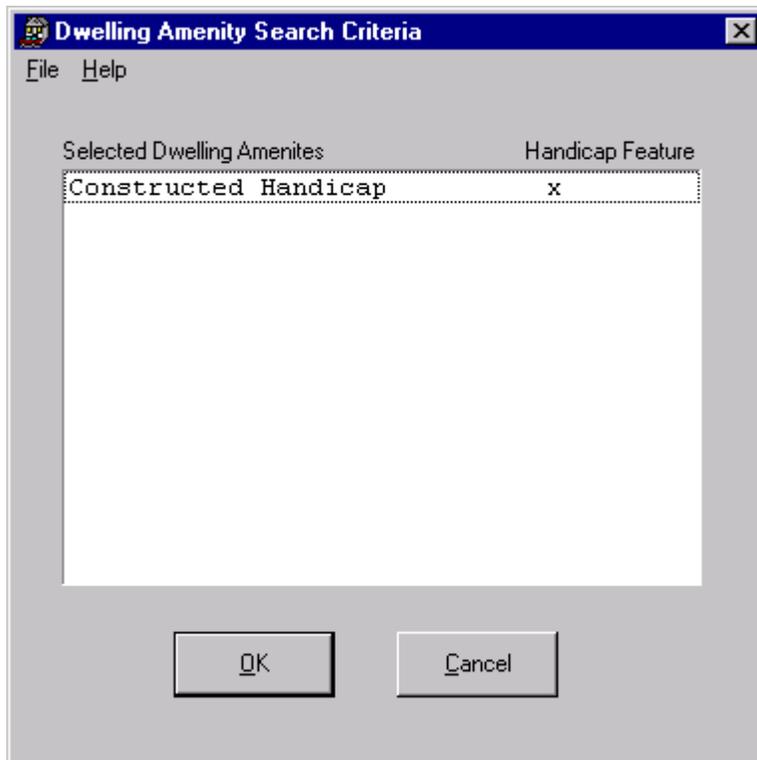

This screen example illustrates this dwelling unit has an amenity of **“Built Handicap Accessible”** identified as a **“Handicap Feature”**. (Select the **Close** button to exit back to the ACA-205 screen.)

NOTE: See the write-up for ECP-529 regarding how **“Handicap Types”** are established for AFH dwellings as well as how to establish amenities with **“handicap features”**.

In addition to searching for AFH dwelling identified as a specific **“Handicap Type”**, you also have the ability to narrow the search further by using the **“Amenity Selection”** button. (See the following screen illustrating this example. Also see ECP-530 for specific details about selection of amenities.)

This is the screen that displays when you have chosen the button, **Amenity Selection**, on the ACA-205 screen. In this example, the “**Handicap Type**” selected from the ACA-205 screen was “C”, the “**Handicap Feature**” selected was “**Constructed Handicap**” and the radio button choice “**At least the Selected Amenities**” is to be used. At this point, select the button, **Save Selections**”.

When the button, “**Save Selections**”, is chosen the **Dwelling Amenity Search Criteria** screen displays to let you know exactly what amenities were selected and of the selection(s), which are identified as “handicap feature”.

Select the **OK** button to continue. (Selection of the **Cancel** button carries you back to the ACA-432 **Dwelling Amenities Selection** screen.)

When the **OK** button is selected, you are returned to the ACA-205 **Customer AFH Dwelling Units** screen.

(See the next screen example)

These two dwellings met the amenity selection searched upon.

FOR OFFICIAL USE ONLY
PRIVACY ACT DATA

This screen shows the dwelling units that had the amenity selected and searched upon.

REMINDER: When the radio button choice, “**At least the Selected Amenities**”, is selected on the ACA-432 **Dwelling Amenities Selection** screen, the search must find dwellings that have the amenity or amenities selected. If you searched for two amenities and a dwelling only had one of the amenities selected, this dwelling would not be displayed within the “**Search Results**”. To display dwellings that had one or more of the amenities selected, the radio button choice “**Any of the Selected Amenities**” would have to have been chosen on the ACA-432 screen.

Add New Column “HC” to the ACA-204 Waiting List Sequence Screen as well as the ACA-205 Customer AFH Dwelling Units Screen, Accessed from the Waiting List Sequence Screen (ECP-533)

Because the ACA-205 **Customer AFH Dwelling Units** screen accessed from the ACA-204 **Waiting List Sequence** screen has no **Search** capability, you need to know when a customer on the waiting list has a handicap requirement. As a result, a new column of “**HC**” has been added. (See screen example)

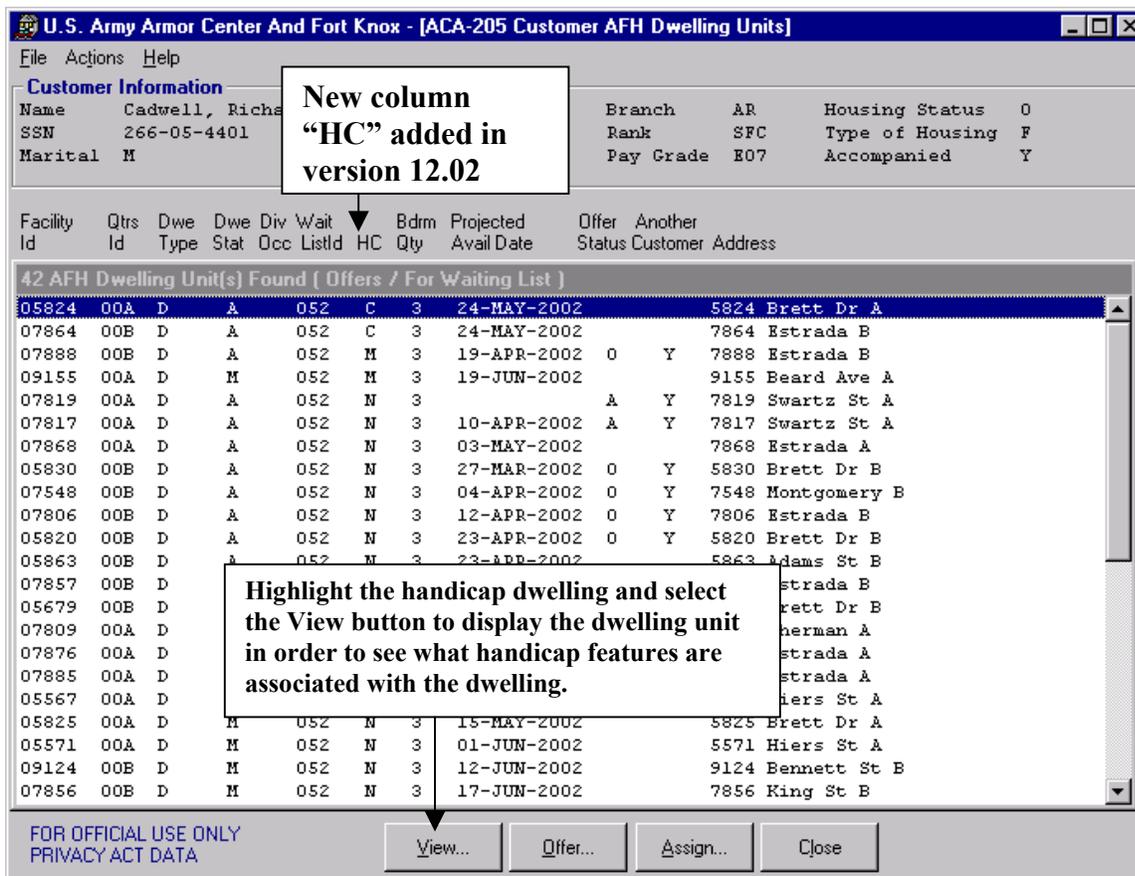

New column “HC” added in version 12.02

Under this column either “Y” or “N” displays. A “Y” is present when the checkbox “**Handicap Requirement**” on the ACA-201 **Customer Housing Application** screen has been checked.

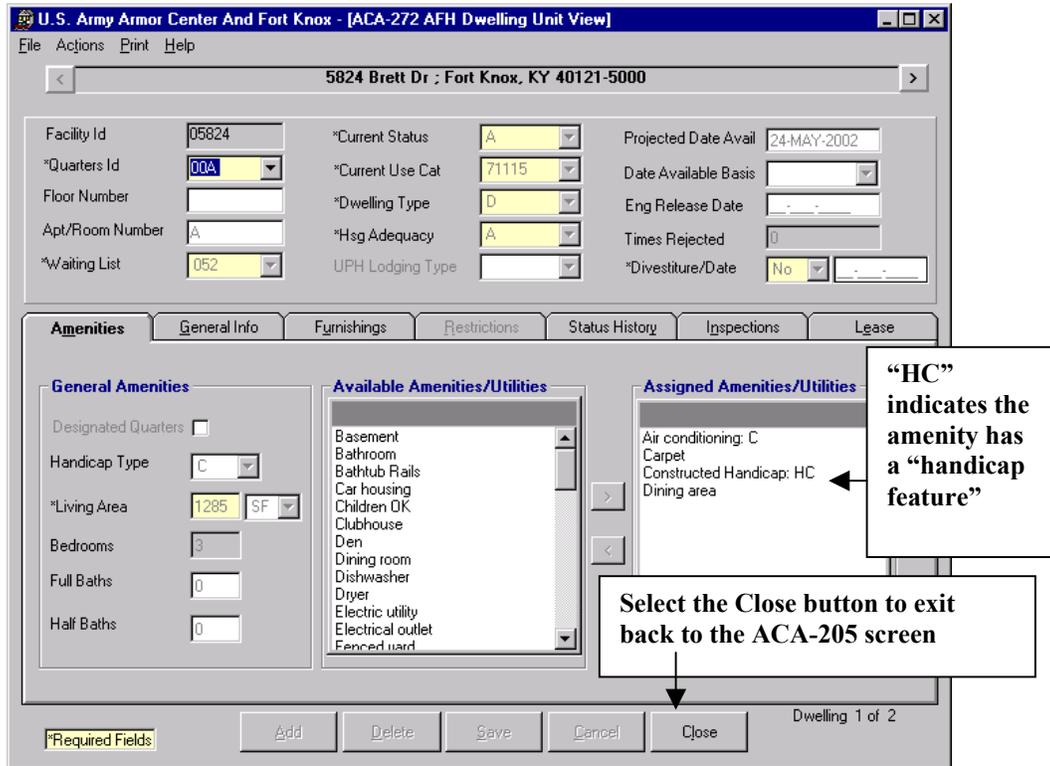

The column “HC” on this screen displays either:

- N – Non-Handicap
- C – Constructed
- M – Modified

This information comes from the field “Handicap Type” on the AFH Dwelling Units Maintenance screen.

The logic for displaying handicap dwellings is the same as explained for the ACA-205 Customer AFH Dwelling Units screen accessed from either the ACA-201 Customer Housing Application screen or ACA-200 Customer Search screen. If the customer has a requirement for a handicap dwelling and meets eligibility criteria for the dwelling (but not based on their handicap requirement but rather their pay grade in association with the “Current Use Category code), handicap dwellings display at the top for those displayed when there are such dwellings. Using the screen example above, there are four dwellings the customer is eligible for that also are identified as having a “Handicap Type” or either “C” or “M”. (First four dwellings displayed)

If you want to see the specific “handicap feature” of the dwelling unit, highlight the dwelling and then select the **View** button.

The **Amenities** tab on the screen shows you what the “**handicap feature**” is for this dwelling. This information is found under the section, “**Assigned Amenities/Utilities**”.

The handicap feature is identified by “**HC**” appearing behind the amenity description. In the above example, “**HC**” appears behind the amenity description, “**Constructed Handicap**”.

(Select the **Close** button to exit back to the ACA-205 screen)

Add Handicap Types to the ACA-446 Off Post Dwelling Unit Maintenance Screen as Well as the Capability to Identify Amenities with Handicap Features (ECP-534)

NOTE: The same functionality added to the ACA-422 AFH Dwelling Unit Maintenance screen is used for the ACA-446 Off Post Dwelling Unit Maintenance screen. In version 12.02, you will see a new dropdown field of “**Handicap Type**”. The dropdown choices are:

- N – Non-Handicap
- C – Constructed
- M – Modified

To make room for this field, the checkbox entitled, “**Inspected**”, has been removed. If the checkbox was checked in version 12.01 and no date recorded in the field “**Inspection Date**”, the date, “**1 Jan 1900**”, will be inserted in this field. (This serves to let you know the checkbox had no date in the “**Inspection Date**” field in version 12.01 and you need to either insert a valid date, leave the “**1 Jan 1900**” date that was inserted when version 12.02 was deployed, or blank out the date field.)

The following is a screen example in version 12.01 showing the checkbox, “**Inspected**”, had been checked, but no date was recorded in the field, “**Inspection Date**”.

Assigned Amenities/Utilities:

Version 12.01 database showing "Inspected" checkbox is checked and no date recorded in the field, "Inspection Date"

*Required Fields Add Delete Save Cancel Close Dwelling 1 of 1

Because the “**Handicap Type**” feature was not available in version 12.01 for “off-post listings”, all off-post listings in your database except “non-listings” will display “**N**” (Non-Handicap) when version 12.02 is deployed at your installation. You must manually change the “**Handicap Type**” field from “**N**” to either “**C**” (Constructed) or “**M**” (Modified), if applicable.

Screen example in version 12.02 showing insertion of the date, “**1 JAN 1900**”. The basis for this is to let you know that in version 12.01 the checkbox, “**Inspected**”, was checked but no date had been entered in the “**Inspection Date**” field. Also, “**N**” is recorded as the “**Handicap Type**” for all off-post listings in your database at the time version 12.02 was deployed since this capability did not exist in version 12.01. This would also save time in going back and recording a “**Handicap Type**” of “**N**” (Non-Handicap) for off-post listings with no handicap features.

ESTABLISHING HANDICAP TYPES FOR OFF-POST LISTINGS AS WELL AS IDENTIFY AMENITIES WITH HANDICAP FEATURES, VERSION 12.02

The following procedures outline how to perform the function of identifying an off-post listing as having a “**Handicap Type**” and identify an amenity as having a “**Handicap Feature**”.

NOTE: The same functionality used for AFH also applies to off-post listings. See the instructions for ECP-529 for additional details.

*Required Fields Add Delete Save Cancel Close Dwelling 1 of 1

The first step is to select the dropdown for the field, “**Handicap Type**” and select either:

- C – Constructed
- M – Modified

Constructed means the off-post listing was constructed with all handicap features making the dwelling fully handicap accessible.

Modified means the off-post listing was modified to accommodate some handicap features, but may not have all the necessary feature to make it “fully handicap accessible”.

In the above screen example, the “**Handicap Type**” was changed from “N” to “M”.

REMINDER: You will receive the following message if you attempt to add “handicap features” to a non-handicap off-post listing before changing the “N” to either “M” or “C”.

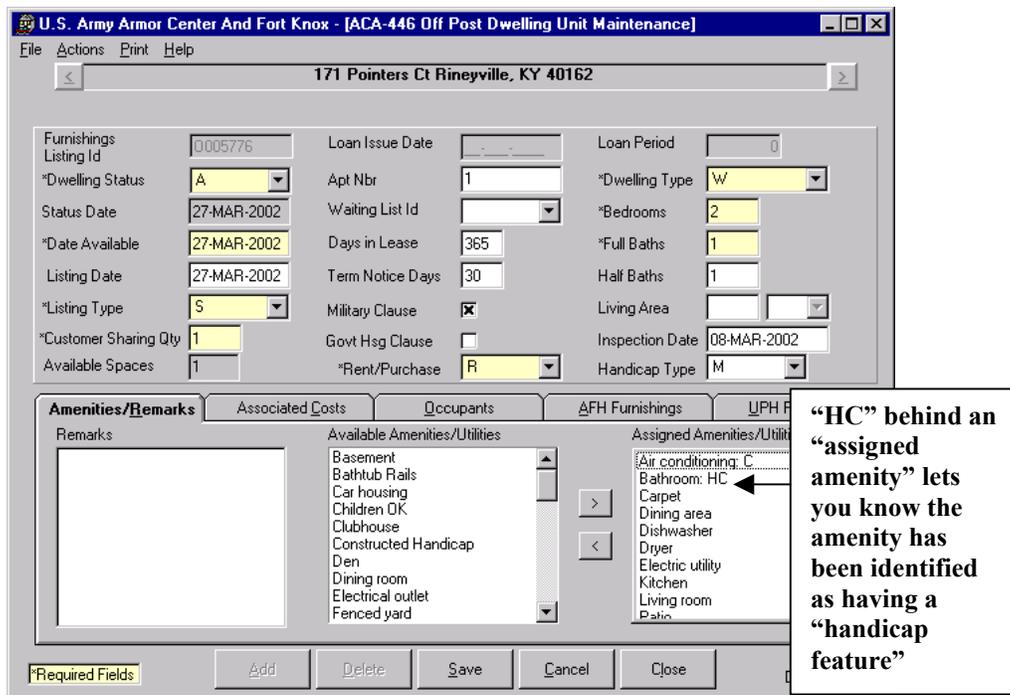

The next step is to select from the “**Available Amenities/Utilities**” section any amenity to be established as having a “handicap feature” or use an existing “**Assigned Amenity/Utilities**” selection and associate it with a “handicap feature”.

REMINDER: You have the option of going through the **Table Maintenance** function of “**Dwelling Amenity**” and adding a new amenity to the choices to define a specific handicap amenity. (See the instructions within ECP-529 for details on how to perform this function.) It is not required to establish a new amenity for each “handicap feature”. Instead, you can take an existing amenity and associate it with a “handicap feature”. For example in the above screen you have an assigned amenity of “**Bathroom**” already associated with this off-post listing record.

To identify an assigned amenity as a “handicap feature”, highlight the amenity.

The above screen shows the “assigned amenity” of “Bathroom” has been highlighted. Next, double click on the highlighted amenity. (The ACA-429 Amenity Detail screen displays)

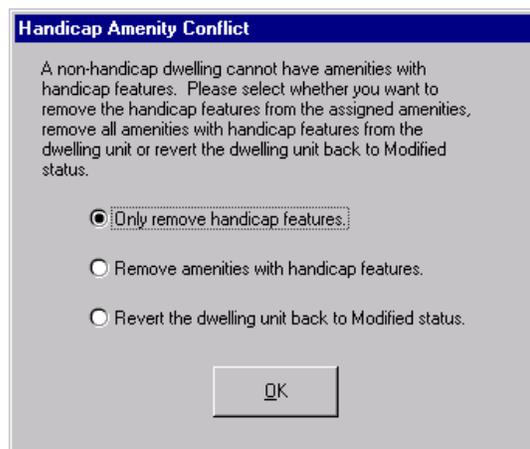

Click on the checkbox, “**Handicap Feature**”, then select the button, “**OK**”. (See the screen example on the next page)

In this screen example, “HC” appears behind the “assigned amenity” of “Bathroom”. This lets you know “Bathroom” has been identified as an amenity with a “handicap feature” associated to it.

REMINDER: Once applicable amenities have been assigned and identified as having a “handicap feature”, you must perform a **Save** function to save the information.

If you attempt to change the “Handicap Type” to “N” when either “M” or “C” are already present, the following message displays.

The first radio button choice, “Only remove handicap features”, removes the “HC” behind the assigned amenity.

The second radio button choice, “**Remove amenities with handicap features**”, not only removes the “**HC**” from behind the assigned amenity description, it also removes the amenity from “**Assigned Amenities/Utilities**” section and places it under the “**Available Amenities/Utilities**” section.

The third radio button choice reverts the “**Handicap Type**” back to either “**M**” or “**C**”, as applicable.

ALTERNATIVE METHOD TO REMOVE AN AMENITY HANDICAP FEATURE INDICATOR

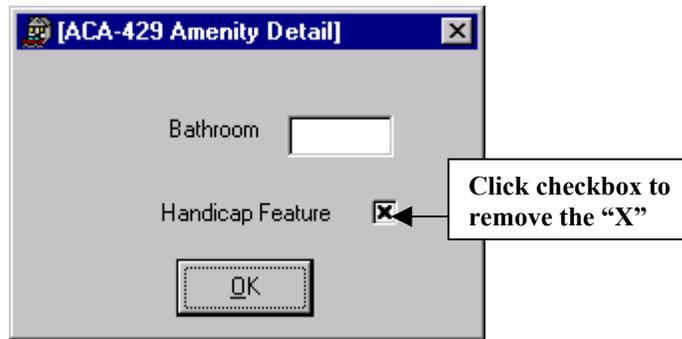

The following example is used to illustrate another method of removing the “**HC**” from an “assigned” amenity description.

The screenshot shows a software application window titled "U.S. Army Armor Center And Fort Knox - [ACA-446 Off Post Dwelling Unit Maintenance]". The window displays a form for a dwelling unit at "171 Pointers Ct Rineyville, KY 40162". The form includes various fields for property details, such as "Furnishings Listing Id", "Loan Issue Date", "Loan Period", "*Dwelling Status", "Apt Nbr", "*Dwelling Type", "Status Date", "Waiting List Id", "*Bedrooms", "*Date Available", "Days in Lease", "*Full Baths", "Listing Date", "Term Notice Days", "Half Baths", "*Listing Type", "Military Clause", "Living Area", "*Customer Sharing Qty", "Govt Hsg Clause", "Inspection Date", "Available Spaces", "*Rent/Purchase", and "Handicap Type".

Below the form are tabs for "Amenities/Remarks", "Associated Costs", "Occupants", "AFH Furnishings", and "UPH Furnishings". The "Amenities/Remarks" tab is active, showing a "Remarks" field and two lists: "Available Amenities/Utilities" and "Assigned Amenities/Utilities". The "Assigned Amenities/Utilities" list contains "Air conditioning: C", "Bathroom: HC", "Carpet", "Dining area", "Dishwasher", "Dryer", "Electric utility", "Kitchen", "Living room", and "Patio". A callout box points to "Bathroom: HC" with the text "Handicap Feature Indicator".

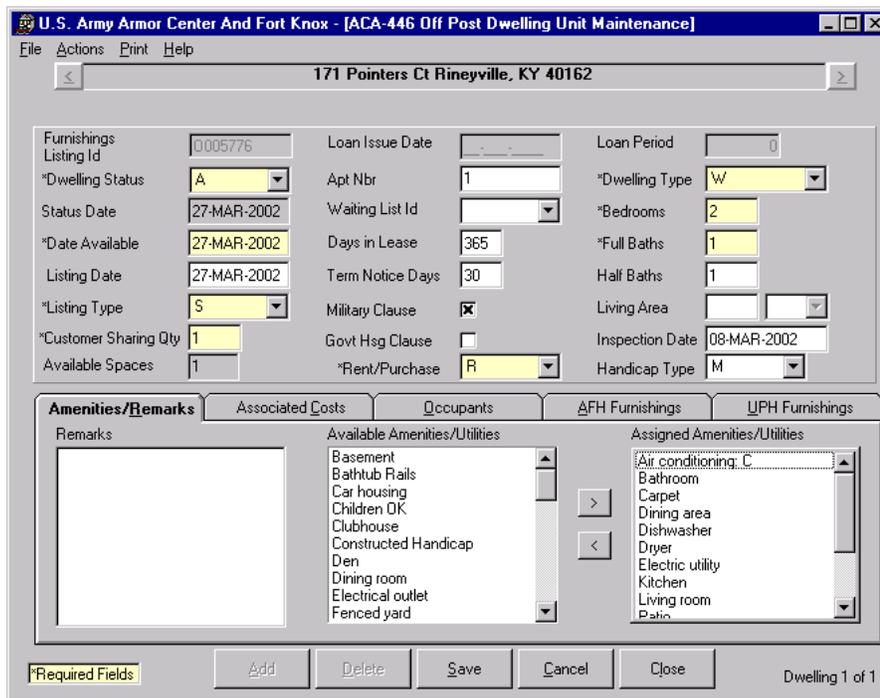

At the bottom, there are buttons for "Add", "Delete", "Save", "Cancel", and "Close", and a status bar showing "Dwelling 1 of 1".

The screen example shows “**HC**” behind “**Bathroom**”. To remove it, double click on the amenity. (The ACA-429 **Amenity Detail** screen displays)

Click on the checkbox with the “X” to remove it.

The “X” no longer appears in the checkbox when you click on it. Select the **OK** button. (The ACA-446 Off Post Dwelling Unit Maintenance screen re-appears)

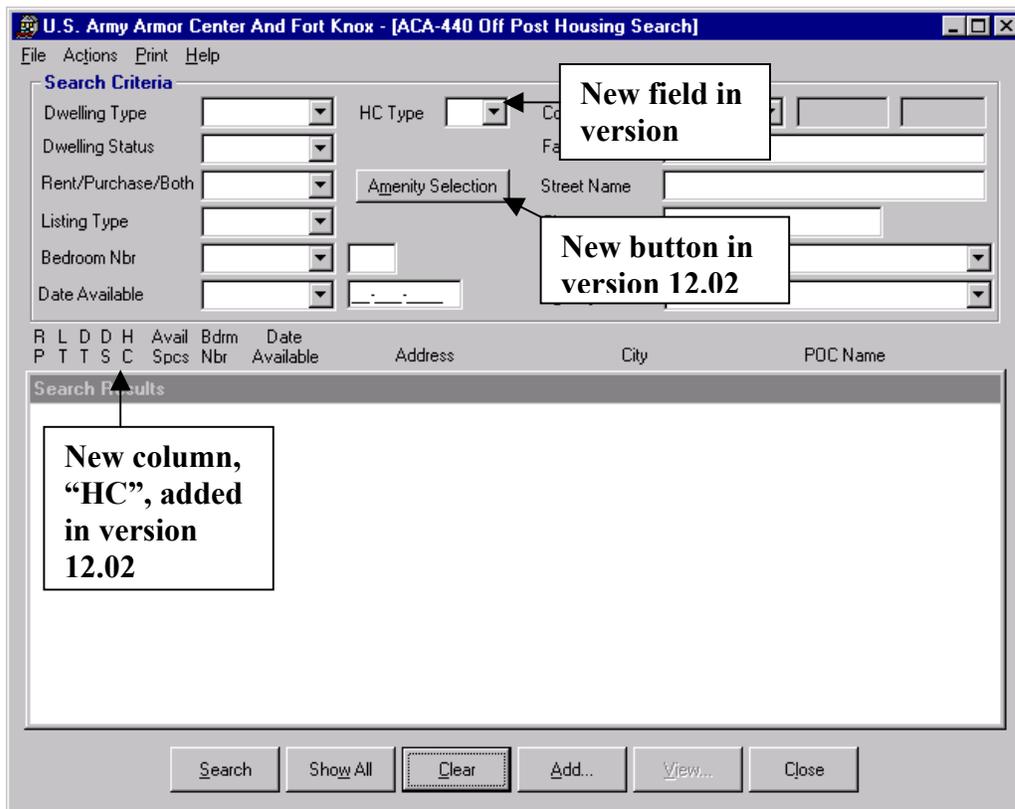

As illustrated by the screen, the “HC” no longer appears behind the amenity description of “Bathroom”.

Add the Capability to Search for Handicap Off-Post Listings as Well as Make Specific Amenity Selections (Handicap or Non-Handicap), if Desired (ECP-535)

The ability to search for handicap off-post listings has been added to the Off Post Housing Search screens. In addition to this capability, you will now be able to search for a specific handicap feature and/or amenity, if desired.

REMINDER: See ECP #534 instructions related to establishing handicap features. This must be done before you can search for amenities with “handicap features”.

In version 12.02, two new capabilities have been added. One is the ability to search for off-post listings constructed or modified for handicap accessibility, if desired or applicable. The second new capability is the ability to select specific amenities (either by “hand feature”, “non-handicap feature” or both) available within an off-post listing. This is accomplished using the button entitled, “Amenity Selection”.

The dropdown choices for the new search field, “HC Type”, are:

- B – (Both – Construction or Modified)
- C – (Constructed Only)
- M – (Modified Only)
- N – Non-Handicap

USING THE BUTTON, “AMENITY SELECTION”

If you want to look for off-post listings with specific amenities, you must select the button, “Amenity Selection”. If looking for specific handicap amenities, first select the dropdown for the field, “HC Type”, and then select “B”, “C” or “M”, as applicable. (The ACA-432 Dwelling Amenities Selection screen displays)

Available Amenities	Amenity Choice	Handicap Feature

Den	<input type="checkbox"/>	<input type="checkbox"/>
Dining area	<input type="checkbox"/>	<input type="checkbox"/>
Dining room	<input type="checkbox"/>	<input type="checkbox"/>
Dryer	<input type="checkbox"/>	<input type="checkbox"/>

Include dwelling(s) with

At least the Selected Amenities Any of the Selected Amenities

The above screen example shows a “**HC Type**” of “**B**” (Constructed or Modified) was selected on the ACA-440 search screen. In this scenario, you start under the column “**Handicap Feature**” to identify the desired amenities associated with a handicap feature. Scroll through the list and find the desired amenity and then click on the checkbox to activate it and then click again to make your selection under the column “**Handicap Feature**” for the desired amenity.

NOTE: When you make your selection under the column, “**Handicap Feature**”, the box under the column “**Amenity Choice**” is automatically checked. This saves a step so you do not have to click on both boxes. If not looking for an amenity with a handicap feature, click on the box under the “**Amenity Choice**” column.

(See the screen example on the next page illustrating this scenario.)

Using the above screen example, the “**Amenity Choice**” of “Air conditioning” has no association to a “handicap feature”. However, the “Bathtub Rails” does have an association to a “handicap feature”.

Once the amenity selection(s) have been made, the next step is to leave the radio button choice, “**At least the Selected Amenities**”, activated or change to the radio button choice, “**Any of the Selected Amenities**”.

The first selection means that the dwellings searched upon must have all the amenities selected. (If not, the **Search Results** displays, “**0 Records Found**”.)

The second radio button choice means the **Search Results** will return any dwelling unit meeting one or more of the amenity choices.

The button choices on the screen are:

- Save Selections**
- Clear All Selections**
- Cancel**

The **Cancel** button means you want to **Cancel** the amenity selection function and close back to the ACA-440 **Off Post Housing Search** screen.

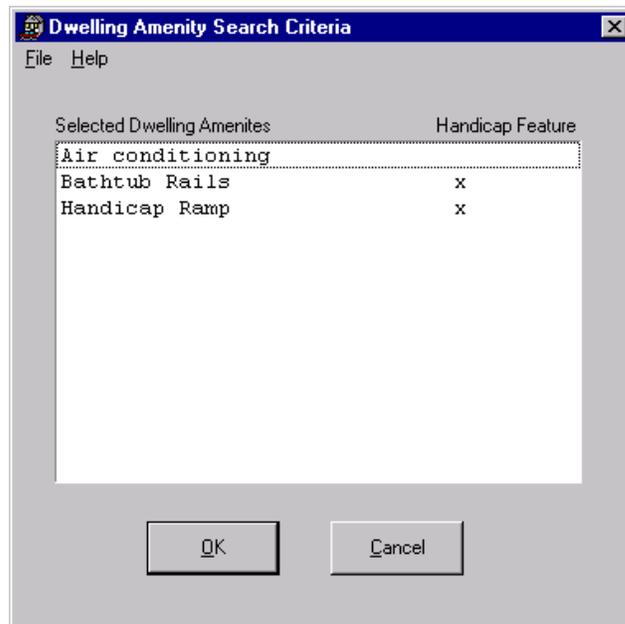

When the **Cancel** button is selected, the following message displays.

(Select, “**Yes**” or “**No**”, as applicable.)

The button choice, “**Clear All Selections**”, on the ACA-432 screen will clear any amenity choice(s) selected in order to re-enter selections.

The button choice, “**Save Selections**”, on the ACA-432 screen means you are satisfied with your selections and want to proceed. When this button is chosen, the “**Dwelling Amenity Search Criteria**” screen displays. It is a re-cap of exactly what amenity choice or choices you have chosen.

Selecting the **Cancel** button returns you to the ACA-432 **Dwelling Amenities Selection** screen.

Selecting the **OK** button returns you to the ACA-440 **Off Post Housing Search** screen.

TRAINING ISSUE

After returning to the ACA-440 **Off Post Housing Search** screen, the button “**Amenity Selection**” appear in *italics* to let you know you have made specific amenity selections. At this stage, you must perform a **Search** function in order to complete the search within the database for the amenities selected.

CAUTION: You may go back and change your amenity selections before you perform the search. However after the search has been performed, you cannot go back and change your amenity selections. Instead, you must perform a “**Clear**” function and start over.

This screen example shows what amenities have been assigned to this off-post listing as well as what amenities have been identified as a “handicap feature” (as indicated by “HC” behind the amenity description).

Add the Capability to Search for Handicap Off-Post Listings as Well as Make Specific Amenity Selections (Handicap or Non-Handicap), if Desired, Using the ACA-206 Off Post Listing Search Screen (ECP-536)

The ability to search for handicap off-post listings has been added to the ACA-206 **Off Post Housing Search** screen. In addition, to this capability, you will now be able to search for a specific handicap feature and/or amenity, if desired. (The ACA-206 screen is accessed from either the ACA-200 **Customer Search** or ACA-201 **Customer Housing Application** screen by selecting the menu bar choice **Actions**, then **Dwelling Unit**, then **Off Post**.)

REMINDER: See ECP #534 instructions related to establishing handicap features. This must be done before you can search for amenities with “handicap features”.

A listing type of “N” de-activates (“grays out”) the Handicap Type and Amenity Selection button.

The above screen illustrates that selection of a listing type of “N” de-activates the field “**Handicap Type**” and the button, **Amenity Selection**.

The dropdown choices for the field, “**Handicap Type**”, are as follows:

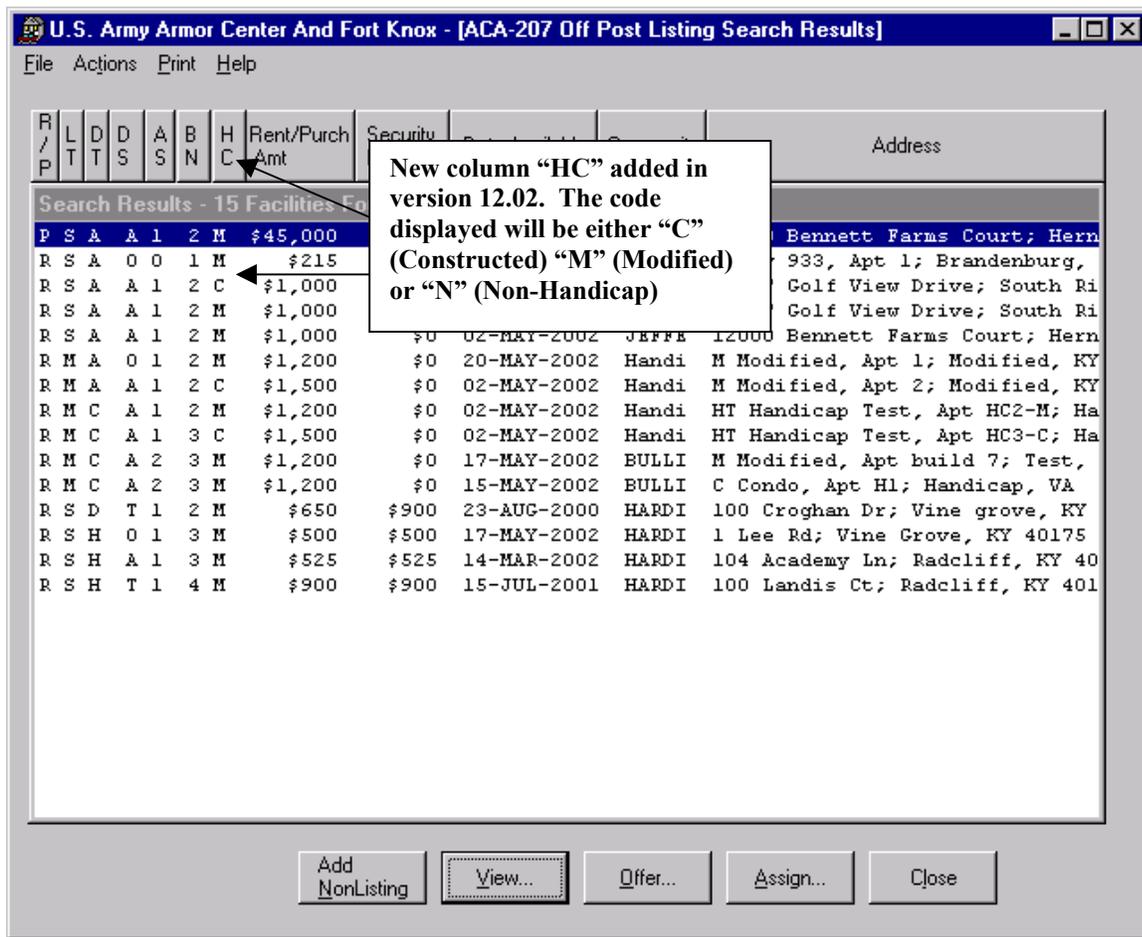

- B – (Both – Constructed or Modified)
- C – (Constructed)
- M – (Modified)
- N – (Non-Handicap)

USING THE BUTTON, “AMENITY SELECTION”

If you want to look for off-post listings with specific amenities, you must select the button, “**Amenity Selection**”. If looking for specific handicap amenities, first select the dropdown for the field, “**Handicap Type**”, and then select “**B**”, “**C**” or “**M**”, as applicable, before selecting the “**Amenity Selection**” button.

Upon selection of the button, the ACA-432 **Dwelling Amenity Selection** screen displays.

NOTE: See the instructions for ECP #535 for details about the ACA-432 screen and how to go about using this screen.

In version 12.02, a new column header of “HC” is present to indicate if the off-post listing has no handicap features (N – Non-Handicap), has been constructed with handicap accessibility (C – Constructed) or modified (M – Modified) to accommodate some handicap features.

NOTE: Even though the handicap types are not applicable to “non-listings, when non-listing records display on the ACA-207 screen you will see “N” under the column “HC”.

Add New Column Header of “HC” to Certain AFH Reports in Order to Identify the Handicap Type of an AFH Dwelling (ECP-539)

In version 12.02, a new dropdown field of “Handicap Type” was added to the ACA-422 AFH Dwelling Units Maintenance screen. The choices for this field are either:

- C – Constructed (Dwelling constructed with full handicap accessibility)
- M – Modified (Dwelling was modified to accommodate some handicap features)
- N – Non-Handicap (Dwelling has no handicap features)

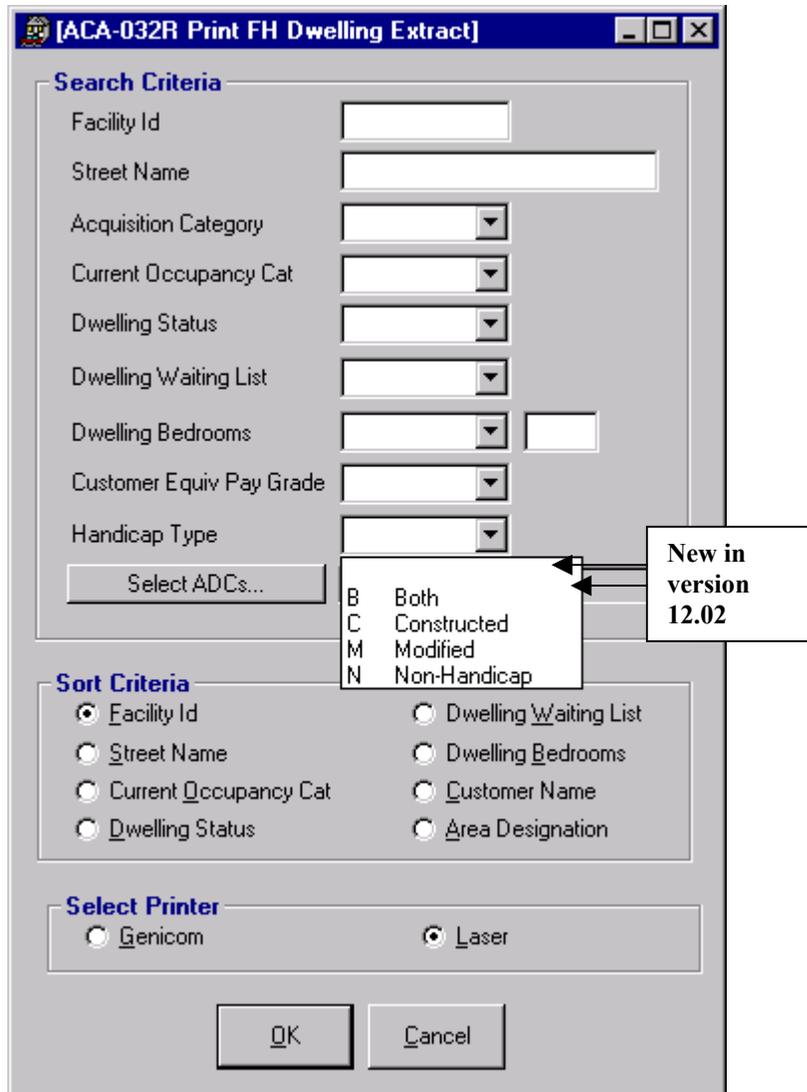

A column header of “HC” was added to the following AFH reports:

- FH Dwelling Extract
- FH Dwelling Listing by Status
- FH Dwelling Maintenance Planning
- FH Projected Vacancies
- FH Unoccupied Dwelling Listing

For the “FH Dwelling Extract” report, you now have the capability to run the report by “Handicap Type”. This new field has been added to the ACA032R Print FH Dwelling Extract report screen. The dropdown choices for this field are:

- B – Both (Constructed or Modified)
- C – Constructed
- M – Modified
- N – Non-Handicap

(See the next page for an example of the ACA-032R screen)

In version 12.02, a new field of “Handicap Type” has been added allowing the capability to run the report for a specific “handicap type”.

Add "HC" Field to Family Housing Dwelling Detail Printout (ECP-539a)

A new field, "HC", has been added to the "Family Housing Dwelling Detail" printout. You will see the code "C", "M" or "N" in this field. ("C" represents constructed with full handicap accessibility, "M" represents modified to accommodate some handicap features and "N" represent Non-Handicap meaning the dwelling has no handicap features.)

(See the screen example of the print showing the new field and code.)

New field and code added in version 12.02. (See the information above for which code you may see for this field)

Add "HC" Column to the Off Post Listing by POC/Status Report (ECP-540)

A new column header of "HC" has been added to the **Off Post Listing by POC/Status** report. You will see the code "C", "M" or "N". ("C" represents constructed with full handicap accessibility, "M" represents modified to accommodate some handicap features and "N" represent Non-Handicap meaning the dwelling has no handicap features.)

(See the screen example of the print showing the new header and code.)

The screenshot shows a report window titled "Listings by POC/Status" with a page number of 1 of 1+ and a total of 169 listings. The report header includes "MAY 2002" and "Department of the Army, DEOS, Housing Division, Fort Knox KY 40121". The title of the report is "Off Post Listings by POC Current Status: Available Rental Listings".

The table has the following columns:

Listing Address Community/Subdivision/Complex	Avail Date/Listing Date	Dwelling Type / HC	Bdrm/Full Bath/Half Bath
Name/Phones: Abele, Dan/Rhonda (Owner); Phone: (H)270.351.2044			
7 Golf View Drive h Riding, KY 20152-0001 E	02 MAY 2002/ 2/2/	Apartment / N	s/s

7 Golf View Drive	02 MAY 2002/		s/s

Two callout boxes provide additional information:

- A box on the right states: **"HC" is new in version 12.02**. An arrow points to the "HC" column header.
- A box at the bottom right states: **New codes for the header "HC" in version 12.02 (See information above as to what each code represents)**. Arrows point to the "N" and "C" codes in the table rows.

Add “Handicap Type” to the Off Post Listing Detail Report (ECP-540a)

In version 12.02, the field “Handicap Type” has been added to the Off Post Listing Detail report. In this field you will see the code of either C, M or N. (“C” represents constructed with full handicap accessibility, “M” represents modified to accommodate some handicap features and “N” represent Non-Handicap meaning the off-post listing has no handicap features.)

ADDS AND CHANGES IN INSPECTION FUNCTION

Activate Dropdown Menu Choice “Inspection Search” When Performing an Add Function from Any Inspection Search Screen (ECP-502)

Performing an “Add” function using any **Inspection Search** screen in version 12.01 did not activate the dropdown menu choice **Inspection Search** on any **Inspection Maintenance** screen. Instead, the choice is de-activated (“grayed out”). This choice should be activated to enable the user to search for inspections by inspector to ensure the inspector is available when scheduling a new inspection. (The screen below is an example in version 12.01 showing the dropdown menu choice “**Inspection Search**” de-activated (“grayed out”).

The screenshot shows a software window titled "U.S. Army Armor Center And Fort Knox - [ACA-281 AFH Inspection Maintenance]". The "Actions" menu is open, and the "Inspection Search" option is highlighted in blue but appears grayed out. A white callout box with a black border points to this option and contains the text: "Inspection Search dropdown menu choice is de-activated in version 12.01". Other menu items include "Non Inspection Day...", "View Inspection Schedule", and "*End Date/Time". The main form area has several sections: "Dwelling" with fields for Facility/Qtrs Id, Street Address, Customer Name, Eng Release Date, Proj Avail Date, and Proj Avail Basis; "Scheduling Remarks" with a large text area; and "Result" with fields for Inspection Result and Result Remarks. At the bottom, there is a "Required Fields" indicator and buttons for "Add", "Delete", "Save", "Cancel", and "Close".

Below is a screen example in version 12.02 showing the dropdown menu choice **Inspection Search** is now activated.

TRAINING ISSUE

When you fail to perform your search from the initial search screen before you get to the applicable Inspection Maintenance screen and then elect to select the dropdown menu choice “**Inspection Search**”, the following message displays.

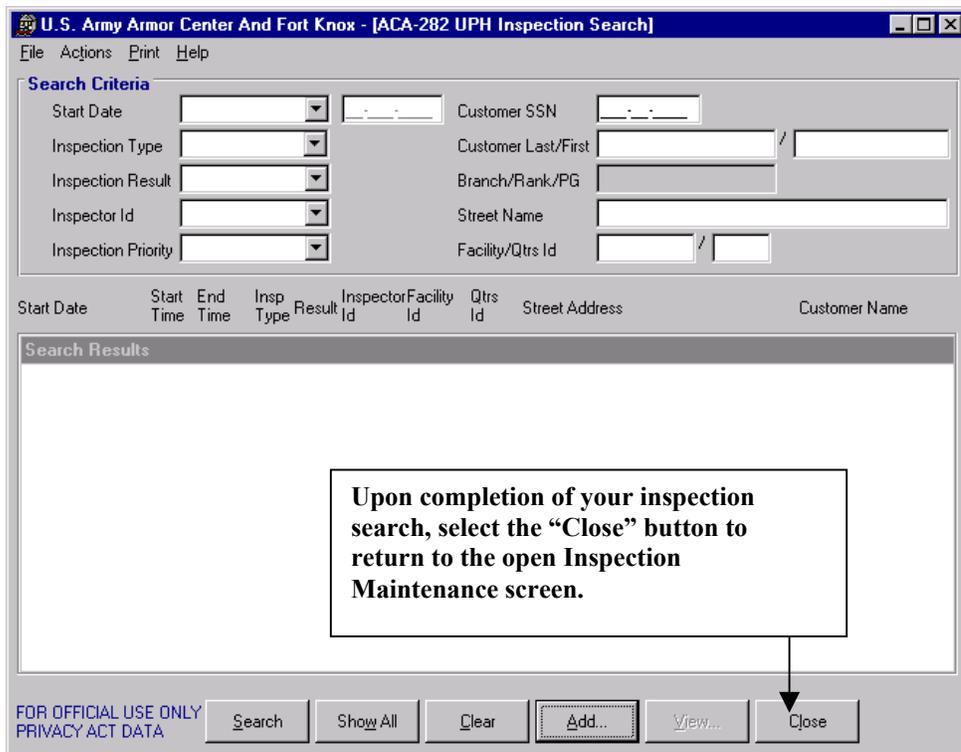

Form Already Open

? The Inspection Search is currently open.
Would you like to redisplay that Inspection Search now?

Yes No

Selecting “**Yes**” re-displays the Inspection Search screen. Selecting “**No**” returns you to the applicable Inspection Maintenance screen.

NOTE: When you go back to the Inspection Search screen, the Inspection Maintenance is still open. Upon completion of your search, perform a **Close** function to return to the open Inspection Maintenance screen in order to schedule an inspection.

Select either, “Yes” or “No”, as applicable. You can avoid the “**Form Already Open**” message box if you select the “**Close**” button after your inspection search has been completed.

Add Capability to Display Any Existing Inspection Record for an Inspector When Conducting an Inspection Search by “Inspector Id” (ECP-503)

When performing a search function for inspections by inspector ID using version 12.01, the search is limited to only inspections related to the particular inspection search screen from which the search is conducted. For example when using the ACA-280 **AFH Inspection Search** screen, the search is limited to only AFH inspections. If the inspector had already been scheduled for either a UPH or Off-Post inspection, the user was never aware of this information. As a result, inspection conflicts arose.

In version 12.02, new functionality has been added to allow for searching for only inspections applicable to the search screen (AFH, UPH or Off-Post) or search for any inspections (AFH, UPH, Off-Post or Non-Inspections) associated to a particular inspector. What follows is an example of the new “**Search Inspection Types**” selection when looking for specific inspection records associated to a particular inspector.

The default is for any inspection record associated to the inspector in question (AFH, UPH, Off Post and Non-Inspections)

When the search is performed from the ACA-280 **AFH Inspection Search** screen, the radio button choice “**AFH Only**” is present (See screen example above). This means you can change the default so the search is only for AFH inspections.

When the search is performed from the ACA-282 **UPH Inspection Search** screen, the second radio button choice reads, “**UPH Only**”, meaning you only want to search for UPH inspection records.

When the search is performed from the ACA-284 **Off Post Inspection Search** screen, the second radio button choice reads, “**Off Post Only**”, meaning you only want to search for Off Post inspection records.

TRAINING ISSUE

The intent of the new functionality is to let the user know what inspections an inspector has scheduled before scheduling any new inspections for the inspector in question. You cannot view an inspection record from the ACA-280 **AFH Inspection Search** screen unless the inspection is associated to an AFH inspection. If associated to either Off-Post or UPH, you cannot access the inspection record. Instead, a message box similar to the following message box displays.

In this example, the user highlighted an off-post inspection and performed a “**View**” function. This message informs the user that an off-post inspection record cannot be viewed from the **AFH Inspection Search** screen. In order to view an off-post inspection record, the user must use the **ACA-284 Off Post Inspection Search** screen.

NOTE: Because such functionality would have required a major database change, the decision was to not include such functionality. As noted previously, the intend of this change is to let the user know if a particular inspector has any other inspections that would conflict with the scheduling of a new inspection.

TRAINING ISSUE

If you perform a **View** function from the applicable search screen and access an Inspection Maintenance screen, the dropdown menu choice **Inspection Search** is not activated. The basis is you are only viewing an existing inspection record and there is no need for the choice to be activated.

NOTE: If you perform a new **Add** function after viewing an inspection record, the dropdown menu choice is also de-activated. If you want to perform an **Inspection Search** function, exit back to the applicable search screen, conduct the search and then perform an **Add** function.

Non-Inspections Do Not Print on Any Inspection Report (ECP-504)

A “**Non-Inspection**” is used to record a day (entire day or portion of a day) or period (several days, week, etc.) when an inspector is not available for inspections. Within version 12.01 of the application software, “non-inspections” scheduled would not print on any inspection printout.

Within version 12.02, any “non-inspection” falling within the inspection date range now will print when run for a particular inspection type (AFH, UPH or Off Post) or all inspections. (See report example below)

Inspection Schedule

New text descriptions for acquisition category codes 17 and 18 in version 12.02

*Required Fields Add Delete Save Cancel Close Dwelling Unit(s)...

The above screen displays the descriptions for acquisition category codes 17 and 18 within version 12.02.

NOTE: The description changes also appear on other screens where acquisition categories display. The below screen is one example.

Add Privatized (RCI) Acquisition Category Codes to HOMES (ECP-512)

The following new acquisition category codes are available in version 12.02:

- 31 – RCI Acquired from Government
- 32 – RCI Built New
- 33 – RCI Built as Replacement for Acquired from Government
- 34 – RCI Minor Renovation for Acquired from Government
- 35 – RCI Major Renovation for Acquired from Government

NOTE: These are only applicable to RCI Privatized Housing.

For sites privatized before the version 12.02 change package and still using HOMES, RCI category “31” will be migrated for all privatized facilities. (This means you will not have to manually change the acquisition category code for facilities with a “**Privatized Date**” recorded on the ACA-421 AFH Facility Maintenance screen.) Test

The **AFH Dwelling Extract** report can also be run by specific “Privatized” (RCI) acquisition category code.

TRAINING ISSUE

If at some point previously Government owned family housing reverts back to Government control, the facility reverts automatically back to the previous Government acquisition category code when you remove the date in the “**Privatized Date**” field.

(This capability is also useful if a user incorrectly selects a “**Privatized**” (RCI) Housing category code by mistake and needs to change it back.)

CONVERT PRIOR GOVERNMENT CONTROLLED AFH FACILITIES FROM PRIVATIZED BACK TO GOVERNMENT CONTROL

The following procedures are to be used when converting a prior Government controlled AFH facility from privatized back to Government control.

Screen example of a privatized AFH facility (as indicated by the acquisition category 31) and a date recorded in the field “**Privatized Date**”.

To return the facility from “privatized” back to Government control, blank out the date in the field “**Privatized Date**”.

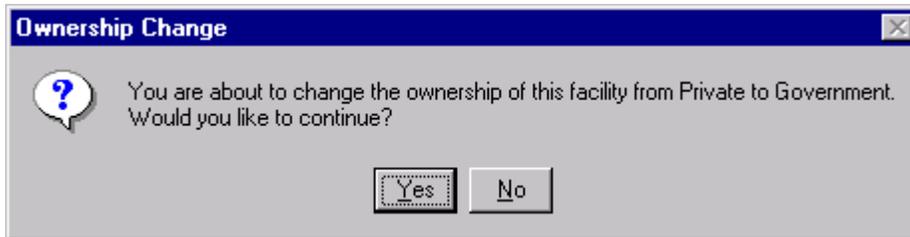

NOTE: Blanking out the date field does not activate the **Save** button. You must enter data in a field before it activates. Suggest you click the checkbox “**On Historical Registry**” and then click on the checkbox to remove the selection in order to convert the AFH facility back to Government control.

Perform a **Save** function. The following message box displays.

This message displays when the facility is being returned to “Government” control and the facility had a previous “government” acquisition category code.

Select **OK** to continue.

Select the “**Yes**” or “**No**” button, as applicable. (If “**Yes**” selected, the acquisition category reverts back to the last “government” acquisition category code within the history records. If you select “**No**”, the facility returns back to “privatized”.)

When you select “**Yes**”, the following message screen displays.

To return the privatized facility back to Government control, delete the privatized date.

NOTE: To activate the **Save** button, you must make a field entry. Select the checkbox “**On Historical Registry**”. (The **Save** button activates) Click on the checkbox again to remove the checkbox and then perform a **Save** function.

When you perform a **Save** function, the above message box displays to let you know the privatized facility has no previous facility history. Select **OK** to exit the message box. Next, select the dropdown for the field “**Acquisition Category**” and select the appropriated acquisition category code. Perform a **Save** function. The following message box displays.

Select “**Yes**” to change the ownership or select “**No**” to abort making the change. (Selecting “**No**” puts everything back the way it was before you removed the date in the “**Privatized Date**” field.)

Tab Switches When Saving Amenity Details (ECP-529a)

In version 12.01, when amenity details were saved, the active tab **Amenities** would get switched. For AFH and UPH dwellings, the tab switched to **“General Info”**. For Off Post housing, the tab switched from **“Amenities/Remarks”**, to **“Associated Costs”**.

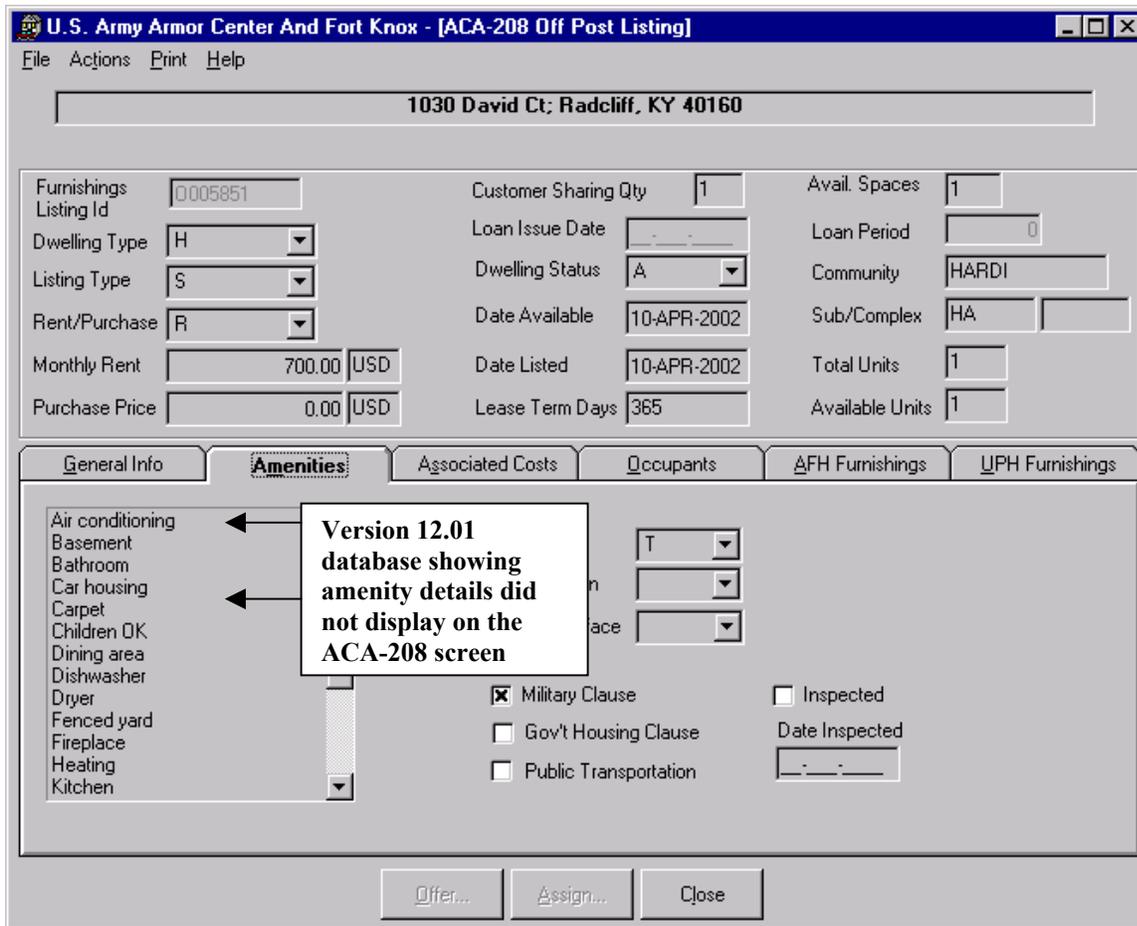

This problem is fixed in version 12.02.

Amenity Details Information Did not Display on the ACA-208 Off Post Listing Screen (ECP-537)

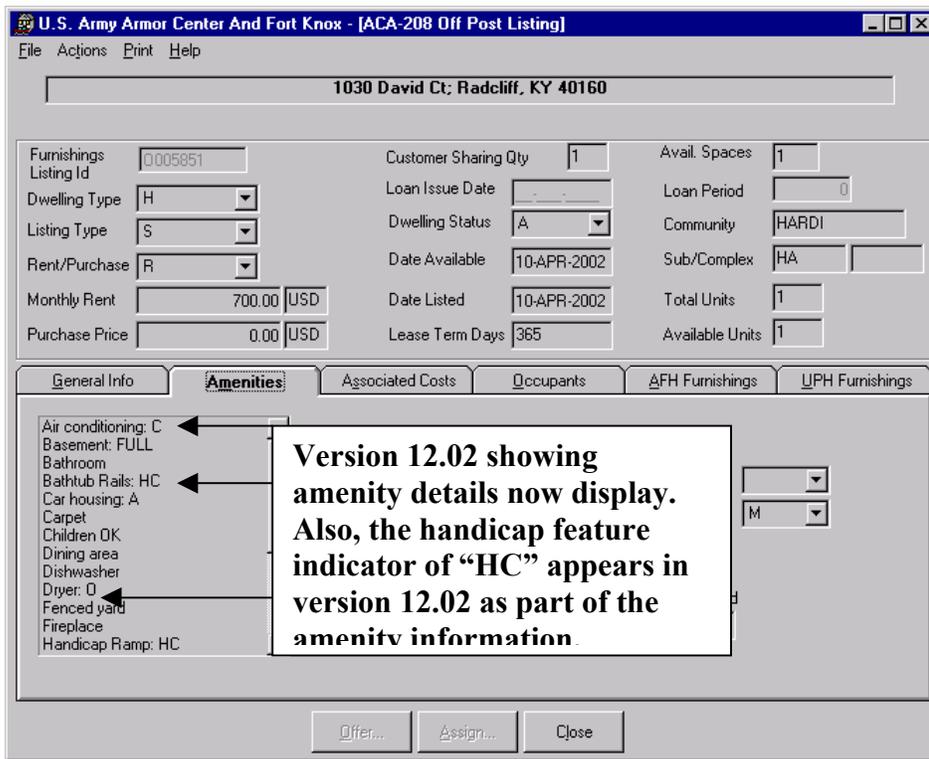

In version 12.01, amenity details information did not display on the ACA-208 Off Post Listing screen. This has been fixed in version 12.02.

The above screen in version 12.01 shows this off-post listing has amenity details (“C” behind “Air conditioning”, “Full” behind “Basement” and “A” behind “Car housing”).

(See this same off-post listing accessed through the dropdown menu choice Customer, Facility>>, Off Post Housing, ACA-206 Off Post Listing Search, ACA-207 Off Post Listing Search Results, View button, next page.)

In version 12.01, the amenity detail information did not display on the ACA-208 screen. This has now been fixed in version 12.02. (See screen example, next page)

In version 12.02, amenity description information now appears behind the amenity description, when applicable, on the ACA-208 screen. When an amenity is identified as a “handicap feature”, you will also see “HC” behind the amenity description.

ADDS AND CHANGES IN REPORTS, PRINTOUTS, AND LISTINGS

Incorrect Costs on Inventory Listing Printout (ECP-510)

For the **Inventory Listing** printout, costs of items in version 12.01 are not recorded correctly. Three problems are:

- 1) Item costs were being rounded upward or downward to the nearest whole dollar amount instead of showing actual dollar and cents.
- 2) The dollar value of an item would not show any value greater than \$999.
- 3) The total costs on the printout reflected the actual dollars and cents value even though the individual costs of the items was rounded to the nearest whole dollar

The following screens are examples of the problems noted in version 12.01 with the unit cost not recorded correctly.

Version 12.02 Database

Listing printout in version 12.02 records the unit costs correctly now and does not round the costs to the nearest whole dollar amount. Also, the field has been expanded to not cut off dollar costs.

No Document Number on Initial Printout of a FOP or OINT Receipt Printed from Either the ACA-682A/B AFH/UPH Receipt Detail Screen (ECP-513)

In version 12.01, the document number would not display/print on an initial printout of a FOP or OINT receipt for either AFH or UPH when printed from the ACA-682A or ACA-682B screens.

The screenshot shows a software window with a standard Windows interface (title bar, menu bar, toolbar, status bar). The main content is a receipt form. The form has a header section with columns for various fields: DRMC, STOCK NUMBER, U/I, Q/T, DOCUMENT NUMBER, SUPPL, SUPPL ADDR., S I G, F I D, D I S, P O T, P R R, R D D, R A I, C V T O, C / C, and UNIT COST. Below the header is a table with one row containing the stock number 7105-00-282-8485, U/I EA, Q/T 1, and UNIT COST \$ 124.00. The form is divided into several sections: 1. SEND TO (C4/80L SUPPLY & SERVICES, ATIX-015, KMOX, KY 40121-5000), 2. REQUEST FROM (Purchasing Management Branch, Bldg T-10 Engineer Street), 3. MARK FOR, 4. PROJECT, 5. TOTAL COST, 6. TRANS CODE, 7. AUTHORITY, 8. ITEM (Req. Buak), 9. MFR CD/PART#, 10. M, 11. MFR. NAME, 12. TRANS COST (\$ 0.00), 13. TYPE REQ/REC (Found On Post Recd), 14. REMARKS, 15. INITIATING OFFICERS SIGNATURE, 16. DATE, 17. FMO/PBO RECEIVING SIGNATURE, 18. DATE. A text box is overlaid on the form, stating: "Within version 12.01, the 'Document Number' does not display/print when the menu bar choice Print, 'Print Receipt', is chosen from the ACA-682A/B AFH/UPH Receipt Detail screens." An arrow points to the empty 'DOCUMENT NUMBER' field in the header table.

The above shows the problem in the 12.01 database where the “document number” does not display nor print on the printed document.

VERSION 12.02 DATABASE

The screens that follow show the document number problem is now fixed in version 12.02.

The screenshot shows a window titled '1 of 1' with a 100% zoom level. The main content is a form with a header table and several data fields. A callout box is overlaid on the form, pointing to the 'DOCUMENT NUMBER' field.

The above screen shows for a UPH OINT transaction, the document number is now present.

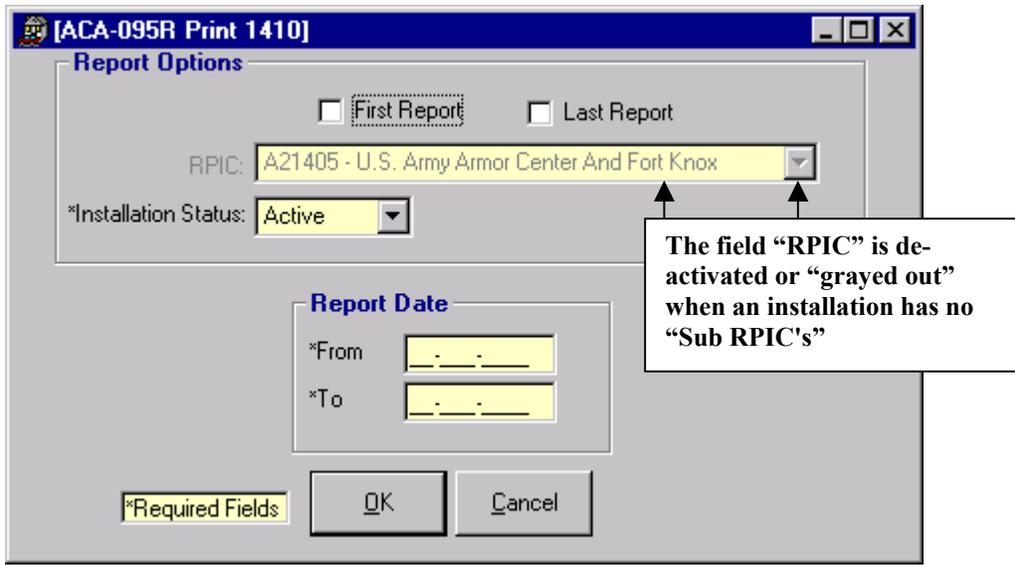

Generate 1410 Report and Display Orphaned RPICS (ACA-421 AFH Facility Maintenance and ACA-435 UPH Facility Maintenance Screens) (ECP-514 & 514a)

The **Family Housing Inventory and Occupancy** (1410) report is new for version 12.02.

The 1410 report selection is accessed from **Admin**, dropdown menu choice **Reports>>**, then the menu choice **Summary**.

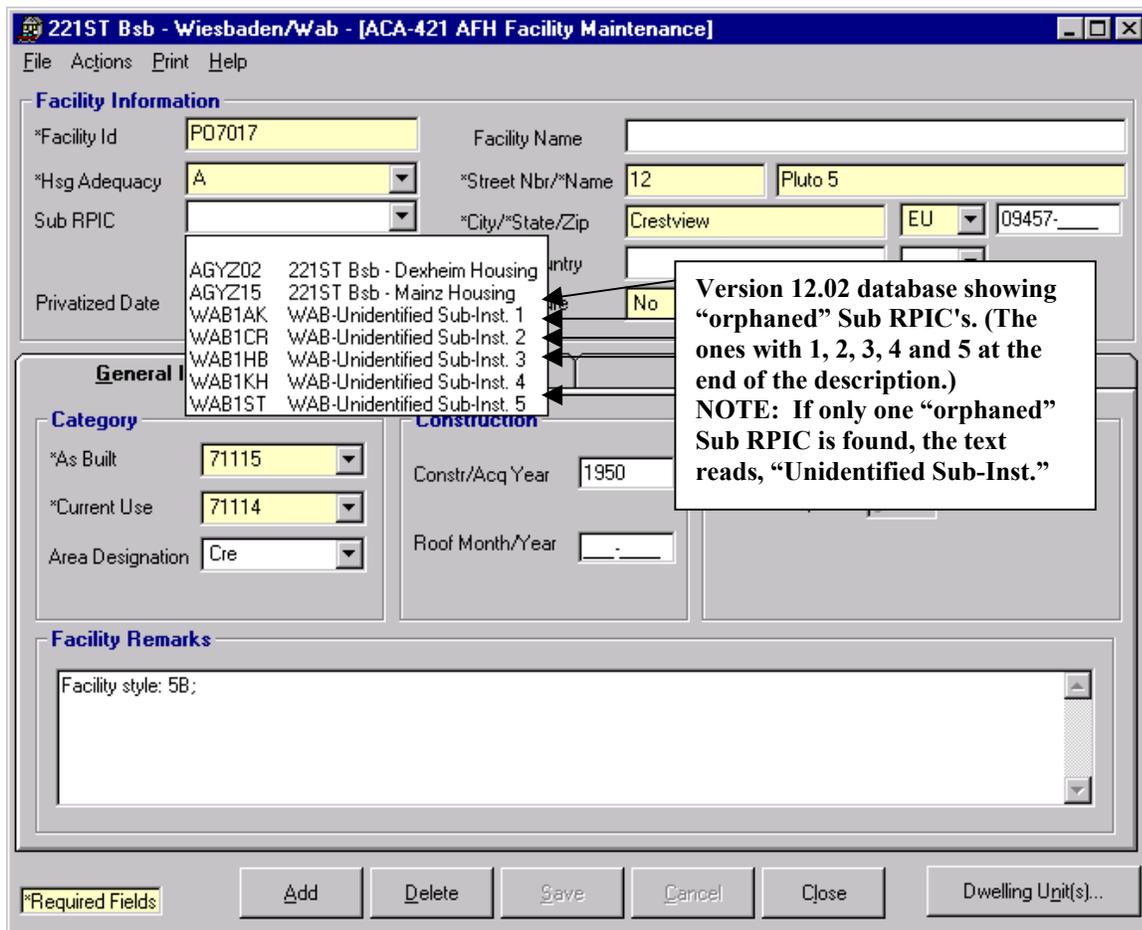

The report is highlighted when the ACA-090R **Summary Report List** screen displays. Select **OK** to continue. The following screen displays. (See next page)

TRAINING ISSUES

IMPORTANT - Before using the 12.02 database after it has been loaded, a site must resolve “orphaned” RPIC’s if a site has any such RPIC’s. When a site has a RPIC shown with ending text description of “**Unidentified Sub-Inst.**”, this means an RPIC was found within the “**Installation**” Table that is currently “orphaned”. (When more than one “unidentified sub-installations is found, you will see a number behind the text. For example, “**Unidentified Sub-Inst 1**”, **Unidentified Sub-Inst 2**”, etc.) Either the RPIC needs to be properly identified or deleted. When this scenario is applicable, you need to contact the HOMES Help Desk so that the SRA database team can resolve the issue.

NOTE: “Orphaned” RPIC’s in version 12.02 display on the ACA-421 **AFH Facility Maintenance** and ACA-435 **UPH Facility Maintenance** screens under the field “**Sub RPIC**”. (See screen examples, next two pages)

Screen example of the ACA-421 **AFH Facility Maintenance** screen showing “orphaned” Sub RPIC’s. (Only appears in version 12.02 if “orphaned” Sub RPIC’s found.)

**“Orphaned” Sub-RPIC’s
 found when version 12.02
 was loaded.**

The “orphaned” Sub RPIC’s is also applicable to the ACA-435 UPH Facility Maintenance screen.

In addition to resolving the issue with RPIC's, a determination needs to be made whether sub-RPIC's should be listed under the parent or whether you need to establish one or more of the sub-RPIC's as a default installation. When the latter is applicable, you need to contact the HOMES Help Desk so that the SRA database team can resolve the issue.

RAMIFICATIONS – If you elect to establish a separate default installation for an installation currently shown as a “sub-RPIC” to the parent, this means you will have to run a separate BOP, 1410 and 1411 report for each default installation. The following example is used to clarify this issue.

You currently have a “parent” installation that is the default installation. (For example purposes this will be called “Installation A”.)

You have a sub-installation listed under the “parent”. (For example purposes this will be called “Installation B”)

You have another sub-installation listed under the “parent”. (For example purposes this will be called “Installation C”)

When you run BOP now (version 12.01), the sub-installations (B and C) facilities are listed along with the “parent” installation facilities.

If you make “Installation B” a default installation (in version 12.02), you will need to run BOP just for this installation. When you run BOP for installation “A” and “C”, installation “B” facilities will no longer be included.

If you make “Installation C” another default installation (in version 12.02), you would then have to run three separate BOP reports. (One for Installation “A”, one for Installation “B” and one for installation “C”.)

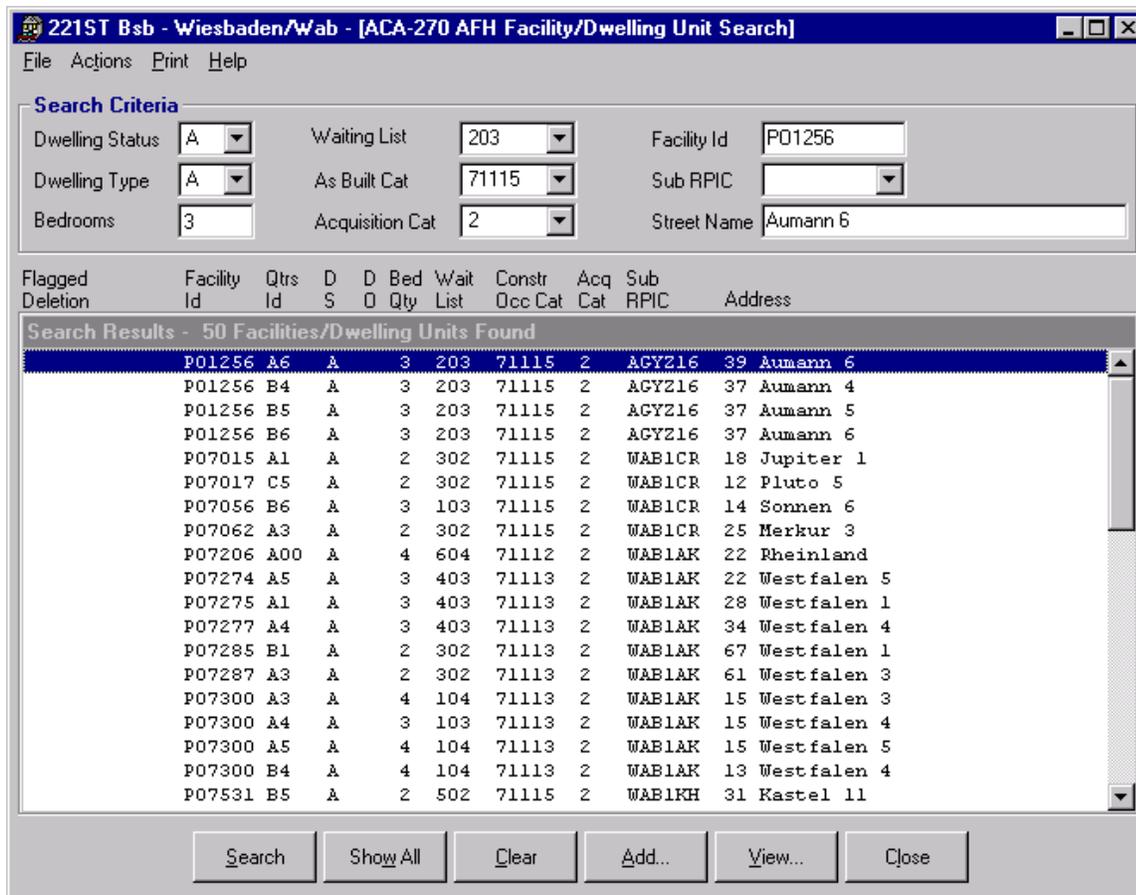

This explanation would also be applicable to the 1410 and 1411 reports.

REMINDER: Any changes of this nature must be performed before users can start using version 12.02. Again, someone from the SRA database team must be contacted to assist you with making any change of this type.

NOTE: Any site which previously had a default installation established with no AFH facilities should contact the Help Desk regarding removal of the default installation from the database.

Example – Fort McPherson had Fort McPherson established as a default installation. There was another default installation of “Gillem” established, but no facilities were associated with this default installation. Instead, all of the facilities associated with Gillem were recorded under Fort McPherson as being a sub-RPIC. If the Gillem default installation is not needed on the Fort McPherson database, Fort McPherson should contact the Help Desk in regard to deletion of the default installation, “Gillem”.

Parent RPIC's in version 12.01 show up on the AFH Facility Search screens as “Sub-RPIC's”. (See screen example next page)

Screen example in version 12.01 showing that the “parent” RPIC displayed under the column “**Sub RPIC**”. This is not correct because only “Sub RPIC” should be displayed under this column. (This has been fixed in version 12.02)

In version 12.02, no RPIC is shown unless it is a “**Sub RPIC**”. For facilities associated with the “parent” RPIC, the field is now blank. (See screen example, next page)

The "parent" RPIC no longer displays under the field "Sub-RPIC" in version 12.02

Screen example in version 12.02 showing the "parent" RPIC no longer displays under the field "Sub-RPIC".

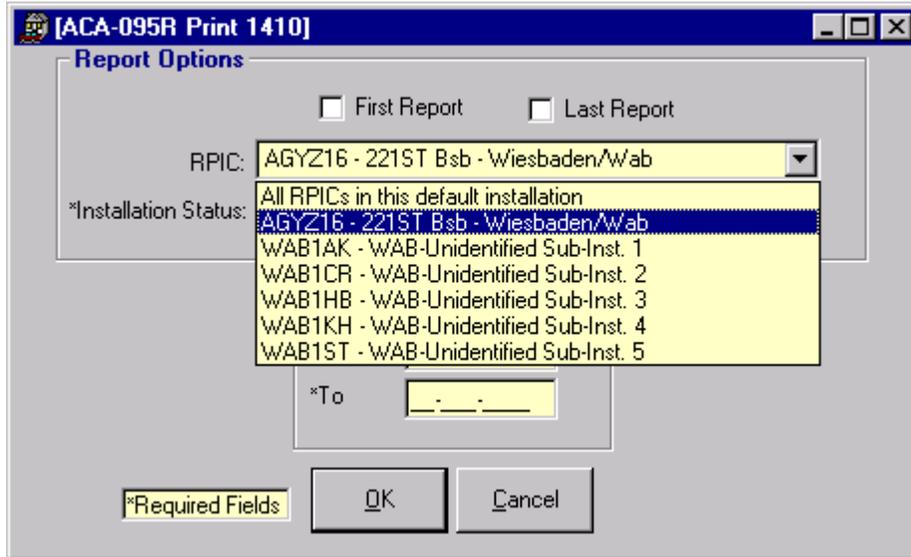

The checkbox “**First Report**” is only checked if your installation just came into existence. **Do not select unless applicable.**

The checkbox “**Last Report**” is only checked if this is the very last 1410 report for your installation. **Do not select unless applicable.**

The dropdown field RPIC is de-activated (“grayed out”) when your installation has no sub-RPIC’s. If your installation has sub-RPIC’s, the options for running the 1410 report are:

- Parent RPIC only (Default Value)
- All RPIC’s (“Parent” plus all “Sub-RPIC’s”)
- Sub-RPIC only (Only for a specific selected “Sub-RPIC”)

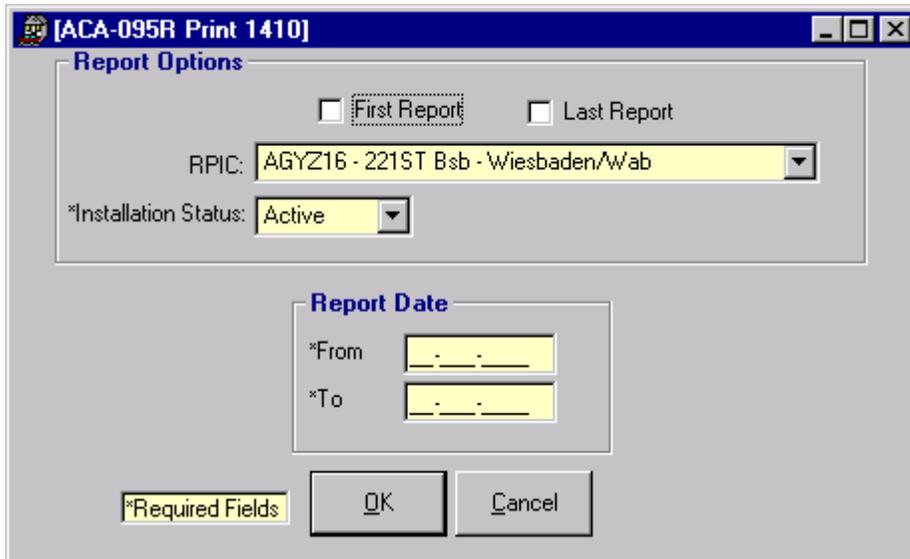

This above ACA-095R screen represents a site with multiple RPIC’s. The report defaults to the “parent” RPIC. To display the other choices, select the dropdown for the field **RPIC**. (See screen example next page)

NOTE: The above screen example shows there are “Sub RPIC’s”. As noted earlier, these must be resolved by either:

- 1) Inserting the appropriate description for the “Sub RPIC”
- 2) Deleting the text “Unidentified Sub-Inst., 1, 2 3, etc., because they are not applicable
- 3) Creating a separate default installation for the “Sub RPIC”, if applicable

REMINDER: When the above scenario is applicable, this must be resolved before users start using version 12.02. This can only be resolved by contacting someone from the SRA database team.

The default value for the field “**Installation Status**” defaults to “**Active**”. **Do not change unless the other choices apply.**

The date format for the report is the same as BOP1 and BOP2 reports. (You normally run it for a specific month using the “From” date starting on the 1st of the month and the “To” date as the 1st of the next month. For example, 1 Apr 2002 to 1 May 2002 would represent the month of April 2002. This means the report includes information as of the 1st and last day of the month represented by the month entered in the “**From**” field.

NOTE: It is recommended that you run the report and maintain a file copy. You will have the capability to run the report for up to the three past fiscal years.

Once the date range has been entered, select the **OK** button to proceed.

CAUTION: Do not attempt to use the instructions in AR 210-50 for the 1410 report to determine the information. Requirements have been updated based on guidance from Peter Gentieu, HIT Team Chief. (Any questions about the requirements should be directed to him.)

A copy of the 1410 requirements used for programming the report may be found at the end of this document.

(See next page for a screen example of the new 1410 report)

The above is a screen example of the 1410 report added in version 12.02.

1410 REPORT TRAINING ISSUES

The **Status History** tab allows for manually entering a **Status History** code to the tab except for a code of “O” (Occupied). When a dwelling is occupied, **you should never enter a status code equal to the date of the last assignment date.** Making such an entry not only has a negative impact on the 1410 report, it also impacts the 1411 and BOP reports.

The following example is used to illustrate this issue.

The screenshot shows a software window titled "U.S. Army Armor Center And Fort Knox - [ACA-422 AFH Dwelling Unit Maintenance]". The address bar displays "102 Fisher Court ; Fort Knox, KY 40121-5000". The interface includes several input fields for facility and dwelling information, such as Facility Id (00100), Current Status (O), and Projected Date Avail. The "Status History" tab is active, showing a table with columns: Status, Effective Date, # Days, Name, Rank, Pay Grade, and Remarks. The table contains three entries: Michael W. Campbell (SGT, E05) assigned on 19-MAR-2002, a manually entered entry on 11-MAR-2002, and Frank Liles (SFC, E07) terminated on 06-DEC-2001. The last row in the table has an asterisk (*) in the Status column. A text box with an arrow points to this asterisk, containing the instruction: "Click here to open up a dropdown arrow to begin the process of manually entering a status history code". At the bottom of the window are buttons for "Add", "Delete", "Save", "Cancel", and "Close", along with a "Required Fields" indicator and "Dwelling 1 of 1" text.

Status	Effective Date	# Days	Name	Rank	Pay Grade	Remarks
O	19-MAR-2002		Campbell, Michael W	SGT	E05	Assigned to Dwelling
A	11-MAR-2002	8				Manually Entered
M	06-DEC-2001	95	Liles, Frank	SFC	E07	Terminated from dwelling
O	18-					
A	20-					
M	14-					
O	29-					
A	08-					
*						

The last or very latest assignment record is for Michael Campbell. The application software allows for a manual entry to be recorded on the **Status History** tab. This is accomplished by going to the last line on the tab [the line with the asterisk (*)] and clicking under the column **Status**. This opens a dropdown arrow in the field. Click on the dropdown to display the choices. (See screen example next page)

Clicking on the dropdown arrow displays the dwelling status codes that can be selected in order

to manually insert a status history record. The intent of this functionality was to insert a dwelling status code if someone incorrectly assigned an incorrect dwelling status when a customer was terminated. For example, the clerk entered a dwelling status code of “A” (Available) when the customer terminated instead of “M” (Maintenance). Rather than revoking the termination and then terminating the customer a second time, the maintenance status can be manually recorded on the Status History tab. The problem that has a negative impact on the reports is when the date entered is the same as the assignment date of a customer. (See next screen example)

U.S. Army Armor Center And Fort Knox - [ACA-422 AFH Dwelling Unit Maintenance]

File Actions Print Help

102 Fisher Court ; Fort Knox, KY 40121-5000

 *Waiting List: 090

The problem is the "Current Status" code reflects the dwelling as "Occupied", yet the Status History tab reflects the dwelling is "Maintenance" meaning the dwelling is vacant. This has a negative impact on the 1410, 1411 and BOP reports.

Status	Effective Date	# Days	Name	Rank	Pay Grade	Remarks

TRAINING ISSUE

Never enter a dwelling status code manually that will impact an assignment record. In the above example, the 19 Mar 2002 manual entry of the status code "M" should never have been entered. The impact on the 1410, 1411 and BOP reports is these reports will reflect the dwelling as vacant and not occupied.

A special script to find the above scenario is to be deployed as part of the 12.02 change package. A spreadsheet will generate if such a conflict is found. You must then contact the Help Desk for resolution of this issue. This issue, if applicable, must be resolved before your site starts using version 12.02 of the HOMES application software.

TRAINING ISSUE TWO

The 1410 report period includes transactions that occurred on the beginning date and all dates between the beginning and end dates but not those that occurred on the end date.

When performing an undelete function of a dwelling unit (or facility and dwellings), the 1410 report displays the dwelling unit in the previous inactive total (line 19) if the dwelling unit was originally inactivated ('D' or 'T') prior to the period of the report. If the dwelling unit was inactivated during the period, it appears on line 21 (Inactivations) during the period as well as the appropriate place for the reactivation (see paragraph three below). The function of "undeleting" basically disregards the fact that the dwelling was ever deleted. This also increases Previous Total (line 12), Present Total (line 18), and Prsnt (Present) Inactive Total (line 23) figures, as applicable.

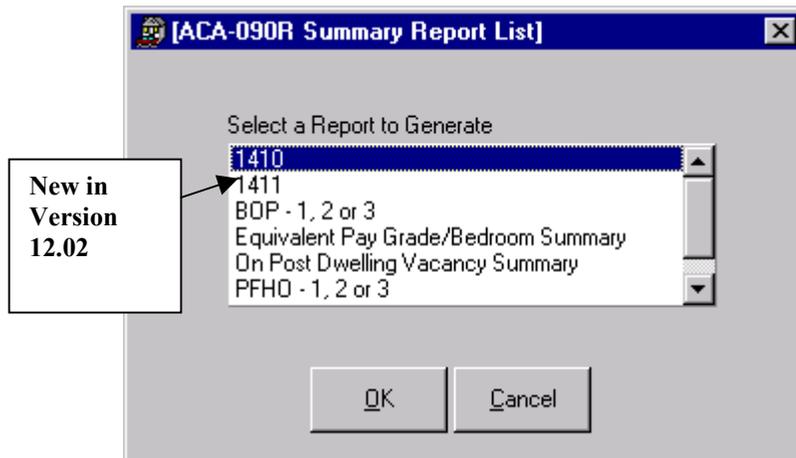

If an undelete function is performed through the facility maintenance screen and both the facility and associated dwellings are undeleted, the dwellings will appear as a reactivation (line 20) on the next day's report. When an undelete function of a dwelling is performed through the dwelling unit maintenance screen, the status can be selected and its effective date recorded. This dwelling appears on the 1410 report in the Reactivations (line 20) based on the effective date and status that was selected. The new status must be an active status (not 'T' or 'D') for the dwelling to appear as a reactivation. If the effective date entered is the current date, the dwelling appears on the next day's report. However if the effective date is backdated, the dwelling appears on the 1410 report if the report date range includes the date the dwelling was reactivated.

Deleted dwellings appear on the report the day after the date that they were deleted.

REMINDER: Go to the end of this document for the specific requirements used for programming the 1410 report.

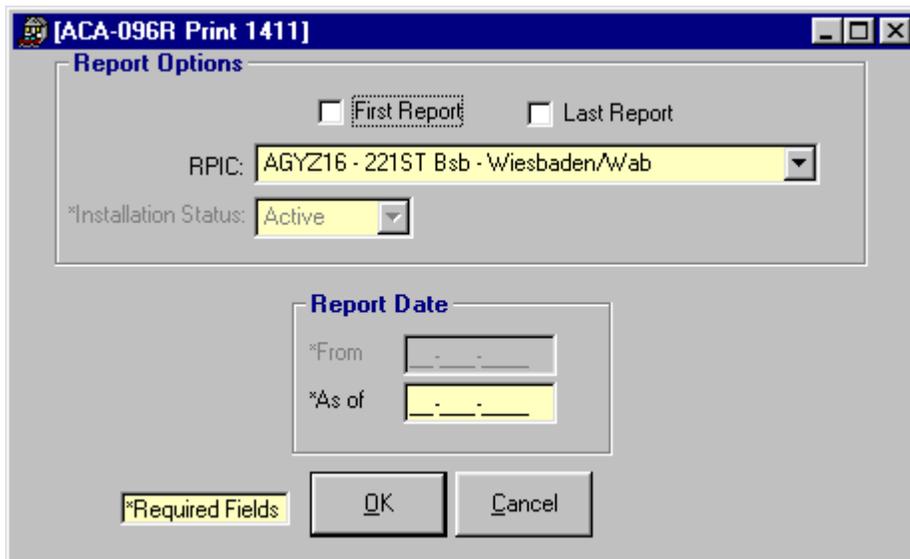

Generate 1411 Report (ECP-515)

The **Family Housing Inventory Designation and Assignment** (1411) report is new for version 12.02.

The 1411 report selection is accessed from **Admin**, dropdown menu choice **Reports>>**, then the menu choice **Summary**.

Click on “**1411**” to highlight the selection and then select the **OK** button. The following screen displays.

NOTE: See the instructions written for the 1410 report regarding the checkboxes “**First Report**”, “**Last Report** and **RPIC** selections (if the **RPIC** dropdown is activated. The **Installation Status** field is not activated for the 1411 Report). This same information is also applicable to the “1411” report.

The format for “**Report Date**” is the same as used for the BOP3 report in that it uses an “**As of**” date. The only difference is for BOP3, the “**As of**” date is recorded as the first day of the next month. **Example** – BOP1 and BOP2 are run with the date range of 1 Apr 2002 to 1 May 2002. When you select the BOP3 report, the “**As of**” date defaults to 1 May 2002, representing information as of 30 Apr 2002.

For the 1411 report if you want the report “as of” 30 Apr 2002, you enter 30 Apr 2002, not 1 May 2002.

It is recommended that you run the report and maintain a file copy. You will have the capability to run the report for up to the three past fiscal years.

CAUTION: Do not attempt to use the instructions in AR 210-50 for the 1411 report to determine the information. Requirements have been updated based on guidance from Peter Gentieu, HIT Team Chief. (Questions about the requirements should be directed to him.)

The requirements documentation used to program the 1411 report may be found at the end of this document.

NOTE: The same training issue regarding manual entry of status history records on the **AFH Dwelling Unit Maintenance Status History** tab noted for the 1410 report also applies to the 1411 report.

Enter the desired “**As of**” date and select the **OK** button.

(See the next page for a screen example of the 1411 report.)

The above is a screen example showing the 1411 report.

Detailed Requirements for 1410 & 1411 Reports (ECP 514, 514a, and 515)

Date: June 11, 2002 (updated from April 24, 2001)
Attendees: Jay Siegel, Dallis Mayo, Wilbur Lewis, Maryanne Winch, Kaye Keith, Tom Tobey, Peter Gentieu

The above group of people met on March 28th to discuss the requirements for implementing the 1410 and 1411 reports. Additional materials that were distributed include:

- Extracts from AR210-50 that covered the 1410 and 1411 reports (26 Feb 1999 online PDF version; pages 100-103, and 111-112)
- An old version of 1410 and 1411 verification rules - steps to take to verify that certain entries in each report are correct, based on entries from other reports
- An updated version of the 1410 and 1411 verification rules
- Sample reports from HOMES2: 1410 Report, 1411 Report, 1410 Footnotes Report, and Facility Vacancy Report

The functional team reviewed these requirements, and some amendments were made in early August 2001. This document now serves as the official requirements for the 1410 and 1411 reports.

Background

These reports are due to the Department of the Army once per year, at the end of the fiscal year. The report is normally run on Oct. 1 of each year, covering the period from Oct. 1 of the previous calendar year to September 30 of the current calendar year.

These reports can be run more often than annually, and some of the sites actually run them quarterly or even monthly.

For sites with multiple RPIC's, these reports can be run for each individual RPIC, or can be run for the entire default installation, aggregated data from all the sub-RPIC's.

General Requirements

- The dwelling units and facilities being referenced in these reports are Family Housing units only.
- When counting how many days a dwelling unit is occupied, include the move-in day, but do not include the move-out day.
- Reports for historical periods shall also be available. **[Note to developers: This could cause similar problems as in BOP when there are rank changes and the history of those changes is not captured.]**

In general, the requirements for the different entries on the reports follow the rules set forth in AR210-50. Additional notes or changes in business rules for each element of the reports are documented below.

Specific Requirements - 1410 Report

Rows 1-11:

- 1) Make sure the report period and the Report Control Symbol (RCS) are included in the report header (see sample in AR210-50). The RCS for the 1410 report is "RCS DD-A&T(A)1081".
- 2) If the report is for a sub-installation, the Installation Name should be in the format <Site Name> - <Sub-installation Name>. If the report is for an entire installation that has multiple RPIC's, include all sub-RPIC names underneath the parent installation name.
- 3) Each site is related to only 1 MACOM. The MACOM Code is in the Installation table and also multiple times in the MILITARY_UNIT table.
- 4) "US Overseas" covers Alaska, Hawaii, and Puerto Rico. "Foreign" covers every other site. "Worldwide" is only used by DoD people who aggregate these reports. CONUS only includes the 48 contiguous states.
- 5) Always use "Individual"
- 6) Always use "Active"
- 7) If the site is a multi-RPIC site where one or more of the sub-installations are not in the same state as the parent installation, use the state abbreviation of the parent installation. This is only applicable to CONUS, Hawaii, and Alaska. If not in the U.S., leave this blank.
- 8) If the site is a multi-RPIC site where one or more of the sub-installations are not in the same zip code as the parent installation, use the zip code of the parent installation.
- 9) Same rules as row #1
- 10) Don't use abbreviations for countries; spell them out.
- 11) Default is "Army" but if the report is for Pearl Harbor, use "Navy".

For rows 12-31, use the following information for the columns:

- a) Count the number of dwelling units the facility's Acquisition Category Code = 7, 17, or 18. However, only use 18 if the site is in Europe. If it is a non-Europe site, do not include Acquisition Category Code 18. Create entries in the 1410 Footnotes report for all dwelling units in Europe with a facility Acquisition Category Code = 18.
- b) Count the number of dwelling units where the facility's Acquisition Category Code = 3
- c) Count the number of dwelling units where the facility's Acquisition Category Code is in (1, 2, 4, 5, 6, 8, 9, 10, 11, 12, 13, 14, 15) and the dwelling unit's Housing Adequacy code = 'A' (Adequate).

- d) Count the number of dwelling units where the facility's Acquisition Category Code is in (31, 32, 33, 34, 35, and the dwelling unit's Housing Adequacy code = 'A' (Adequate).
- e) Sum of columns (a), (b), (c) and (d)
- f) Include all acquisition category codes with the exception of dwelling units covered in columns (h) and (i), and the dwelling unit's Housing Adequacy code \neq 'A'. This should only leave codes 'S' and 'U', which are both substandard codes.
- g) Sum of columns (e) and (f)
- h) Count the number of dwelling units where the facility's Acquisition Category code = 19
- i) Count the number of dwelling units where the facility's Acquisition Category code = 18 and the site is not in Europe.

These column definitions ignore facility Acquisition Category Code 16 (Wherry - Privately Owned). That was done on purpose, because the occupants receive BAH and pay the owner/landlord fair market rent.

Rows 12-18:

The business rules for rows 12-18 are: $12+13+14-15-16-17 = 18$. Since the value for row 18 (Present Total) when the report is run will be the current value in the database (or the value in the database at the end of the reporting period), the intent is for the report designer to get the value for row 18 from the database, then get the values for rows 13-17 from the database history tables, and then calculate the value for row 12 using the opposite of the equation presented above. So $18+17+16+15-14-13 = 12$.

18) This row is the total of all active (Current Status \neq 'T') and inactive (Current Status = 'T') dwelling units that are not flagged for deletion. Create entries in the 1410 Footnotes Report for all dwelling units that are diverted (Current Status = 'D').

17) Count dwelling units where the flagged_deletion_date is within the reporting period and the dwelling unit's Loss Type = 'O' (Other). Also count dwelling units where the acquisition category code or housing adequacy changed such that a dwelling unit was removed from a given column.

16) Count dwelling units where the flagged_deletion_date is within the reporting period and the dwelling unit's Loss Type = 'D' (Disposal)

15) Count dwelling units where the flagged_deletion_date is within the reporting period and the dwelling unit's Loss Type = 'C' (Conversion)

14) Count dwelling units where the facility's Acquisition Type is 'C' (Conversion) and the facility's Added Date is within the reporting period.

13) Count dwelling units where the facility's Acquisition Type is 'A' (Addition) and the facility's Added Date is within the reporting period.). Also count dwelling units where the acquisition category code or housing adequacy changed such that a dwelling unit was added to a given column.

12) Equals $18+17+16+15-14-13$

Rows 19-23:

Same idea as for rows 12-18. The current value (or the value at the end of the reporting period) will be in the database. Since $19-20+21-22=23$, and the value for rows 20-23 are in the database, we can derive the value for row 19 by doing $23+22-21+20=19$.

23) Count the number of dwelling units where the Current Status is 'T' or 'D' (Inactive or Diverted) and where the unit is not flagged for deletion on the last day of the reporting period (the unit may be been flagged between the last day of the reporting period and the day the report is being run).

22) Count the number of dwelling units where the flagged for deletion date is during the reporting period.

21) Count the number of dwelling units where the Current Status was changed to a 'T' or a 'D' (Inactive or Diverted) during the reporting period, and are not flagged for deletion.

20) Count the number of dwelling units where the Current Status was changed from 'T' or 'D' (Inactive or Diverted) to something else during the reporting period.

19) $23+22-21+20=19$

Rows 24-31:

24) Count the number of times dwelling units become vacant. This is different than counting the number of terminations, because in an SM-to-SM situation, there are 2 terminations even though the dwelling unit "becomes vacant" only once.

25) Count the number of times dwelling units become occupied. Need to take into account the same SM-to-SM situation as in row 24, but for assignments.

26) Sum total of the number of days each dwelling unit was available for occupancy during the report period. These include all dwelling statuses except Inactive, Diverted, or Deleted (T, D, or X).

27) Always zero.

28) Row 26 minus row 27. Since row 27 is always zero, it is a repeat of row 26.

- 29) Sum total of the number of days each dwelling unit had dwelling status of 'M' or 'R'
- 30) Sum total of the number of days each dwelling unit had dwelling status of 'A', 'C', 'H', or 'T'
- 31) (Row 30 + row 29) divided by row 28

Row 32:

HOMES does not currently have this data. For now, leave the values as zeroes. For the purposes of the report layout, leave room for 4-digit numbers for both 32a and 32b. Suggest a 5005 for an Excess Date field to be added to the dwelling unit screen.

Rows 33-37:

Count the number of dwelling units that are adequate (Dwelling Unit Adequacy Code = 'A') and are inactive or diverted (Current Status = 'T' or 'D') and are not flagged for deletion. Business rules for the columns are:

- a) Use all Current Category Codes of 71111 - 71114
- b) Change column header to E9-E7. Use Current Category Code of 71115
- c) Change column header to E6-E1. Use Current Category Code of 71116

Rows 38-41:

Count the number of entries on all family housing waiting lists. Do not double count customers who are on more than one waiting list, unless the two lists are split: one is adequate and one is substandard. Business rules for the columns are:

- a) Waiting List Type \neq 'D' (Substandard)
- b) Waiting List Type = 'D' (Substandard)
- c) Calculate the average waiting time (in days) for families that were assigned within the past 3 years to a dwelling unit that was on a waiting list with Waiting List Type \neq 'D' (Substandard). Do not include customers currently on waiting lists as of the end of the report period.
- d) Calculate the average waiting time (in days) for families that were assigned within the past 3 years to a dwelling unit that was on a waiting list with Waiting List Type = 'D' (Substandard). Do not include customers currently on waiting lists as of the end of the report period.

- 38) Use all officer grades. Use Current Category Codes of 71111 - 71114
- 39) Use Current Category Code of 71115
- 40) Change row label to E6-E1. Use Current Category Code of 71116.
- 41) Delete, since row 40 now includes E1-E3

Specific Requirements - 1411 Report

Rows 1-10:

Use the same rules as in the 1410 report. There is no row for Installation Status in the 1411 report, which was row 6 in the 1410 report.

Rows 11-31:

Active units include diverted units in this report. Business rules for the columns are:

- a) Count the number of dwelling units that are active (Current Status \diamond 'T') and adequate (Adequacy Code = 'A') and the facility Current Use Code = 71111
- b) Count the number of dwelling units that are active (Current Status \diamond 'T') and adequate (Adequacy Code = 'A') and the facility Current Use Code = 71112
- c) Count the number of dwelling units that are active (Current Status \diamond 'T') and adequate (Adequacy Code = 'A') and the facility Current Use Code = 71113
- d) Count the number of dwelling units that are active (Current Status \diamond 'T') and adequate (Adequacy Code = 'A') and the facility Current Use Code = 71114
- e) Sum of columns (a), (b), (c), and (d)
- f) Count the number of dwelling units that are active (Current Status \diamond 'T') and adequate (Adequacy Code = 'A') and the facility Current Use Code = 71115
- g) Count the number of dwelling units that are active (Current Status \diamond 'T') and adequate (Adequacy Code = 'A') and the facility Current Use Code = 71116. Change the column header to E6-E1.
- h) Delete this column
- i) Make this the new column (h). Sum of (f) and (g)
- j) Make this the new column (i). Sum of (e) - (new h). The header should be "Total Adequate Units".
- k) Make this the new column (j). Count the number of dwelling units that are active (Current Status \diamond 'T') and substandard (Adequacy Code \diamond 'A'). The header should be "Sub-Standard Total".

Rows 11-16:

Count the number of dwelling units in each column, broken out by number of bedrooms. Row 16 is the sum of rows 11-15.

Rows 17-23:

Uses the same column business rules stated above. Count Army personnel only and Dwelling Status = 'O' (Occupied) and either and the customer's Eligibility Status \diamond 'U' (Unaccompanied Family) or Assignment Priority \diamond 6 (Unaccompanied families of eligible military personnel who currently occupy family housing). Combine rows 22 and 23 to make a new row label of E6-E1. Add the W5 rank to row 19.

Rows 24-26:

Will actually start at row 23 because of the combining of rows 22 and 23. These rows count their respective military service members only, and have Dwelling Status = 'O' (Occupied), and have either the customer's Eligibility Status <> 'U' or Assignment Priority <> 6. The "Other" line under current row 26 (Air Force) should be split into two rows, labeled "Foreign Military" and "Coast Guard. Same rules apply for populating those rows as the other military services. The new rows are: 23 Navy; 24 Marines; 25 Air Force; 26 Foreign Military; 27 Coast Guard.

27) Count dwelling units where Dwelling Status = 'O' (Occupied) and have the customer's Eligibility Status = 'U' or Assignment Priority = 6. This becomes new row 28. Do not double count Eligibility Status of 'U' and Assignment Priority of 6.

28) Count dwelling units where the branch of service is in ('WG', 'CS', or 'NAF'), and Dwelling Status is 'O' (Occupied), and either the customer's Eligibility Status <> 'U' or Assignment Priority <> 6. This is now new row 29.

29) Sum of rows 17-28. This is now new row 30.

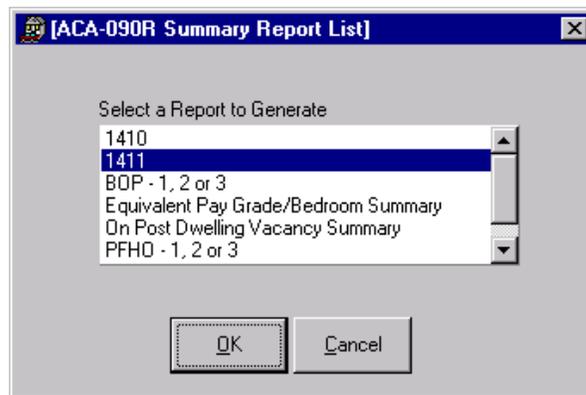

30) Count dwelling units where Dwelling Status <> 'O' (Occupied) or 'T' (Inactive), or ('D' [Diverted] and unoccupied [no one assigned from assignment records]). This is now new row 31.

31) Sum of rows 29-30. Should equal row 16. This is now new row 32.

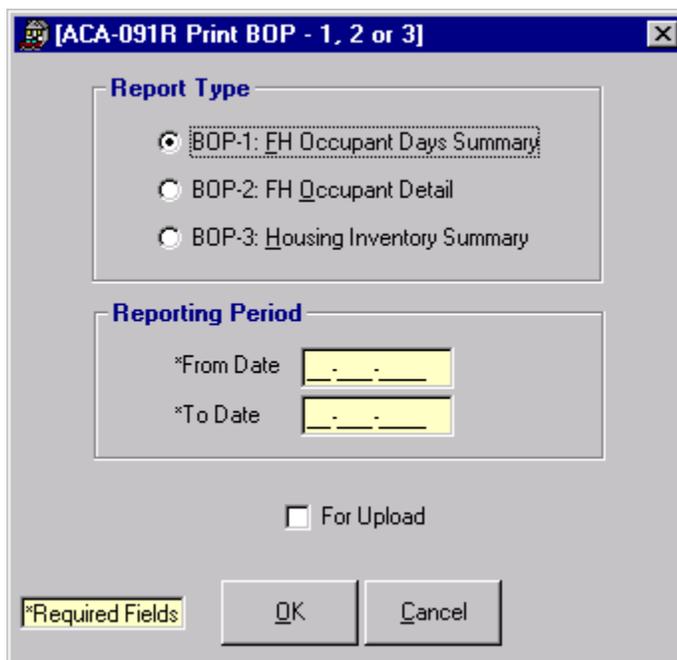

Correct BOP1 Report Discrepancies (ECP-516)

Fixes to the BOP1 report were done using the “**BOP Utility**” program. This program established a separate icon to run BOP reports.

NOTE: The “**BOP Utility**” program goes away with the deployment of version 12.02. To run the BOP reports, select **Admin**, then the dropdown menu choice **Reports>>**, then **Summary**. (The ACA-090R **Summary Report List** screen displays)

Highlight the selection, “**BOP – 1, 2 or 3**” and then select the **OK** button. (The ACA-091R **Print BOP – 1, 2 or 3** screen displays.)

NOTE: The instructions for running BOP reports have not changed from version 12.01.

Re-format the BOP1 Report and Add Additional Information (ECP-516a)

The following is an example of the BOP1 report within the “BOP Utility” program.

Version 12.02 BOP1 Report

This is another screen print of the new BOP1 report in version 12.02 showing the new fields “Non-Army” and “Non-Army Total”.

NOTE: “Non-Army” applies to Air Force, Navy and Marine Corp only. It does not include reimbursable civilians, Coast Guard and Foreign Military. (These are considered “Non-BOP” customers and thus not included on the BOP1 and BOP2 reports.)

Another screen print of the BOP1 report in version 12.02.

NOTE: Peter Gentieu directed these changes to “BOP requirements” and any questions should be directed to him.

Correct BOP2 Report Discrepancies (ECP-517)

Fixes to the BOP2 report were done using the “**BOP Utility**” program. This program established a separate icon to run BOP reports.

NOTE: The “**BOP Utility**” program goes away with the deployment of version 12.02. The instructions for running the BOP2 report have not changed from version 12.01 to 12.02.

Re-format the BOP2 Report and Add Additional Information (ECP-517a)

The following is an example of the BOP2 report in version 12.01.

The report is now sorted by:

- Army
- Non-Army

NOTE: As noted for the BOP1 report, civilians with a rental type of “HA” are included within the “Army” section of the report.

A new column header of “BR” (Branch) has been added to the BOP2 report in version 12.02. (Branch represents the customer’s service branch, for example, Army, Navy, Civil Service, etc.)

**BOP3, Section A,
Version 12.02**

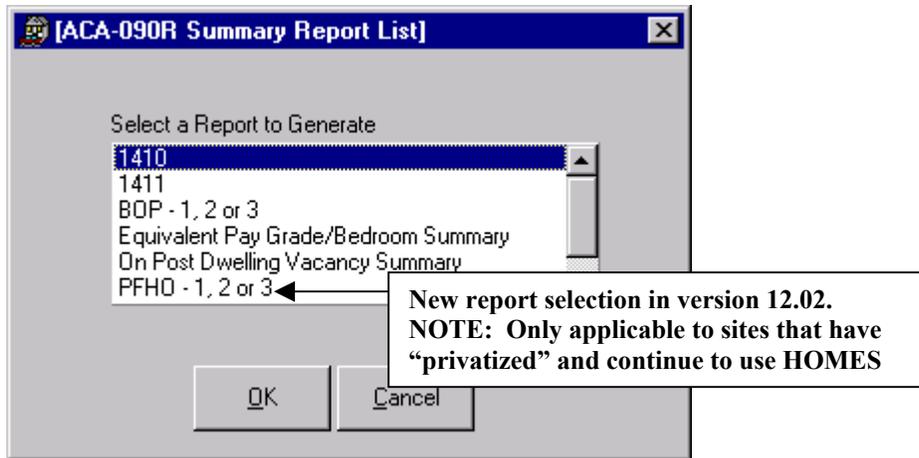

Screen example showing the new field “**Total Non-Army**” in version 12.02 of the BOP3 report.

REMINDER: Peter Gentieu is responsible for the changes outlined. If you have any questions about the new requirements, direct your questions to him.

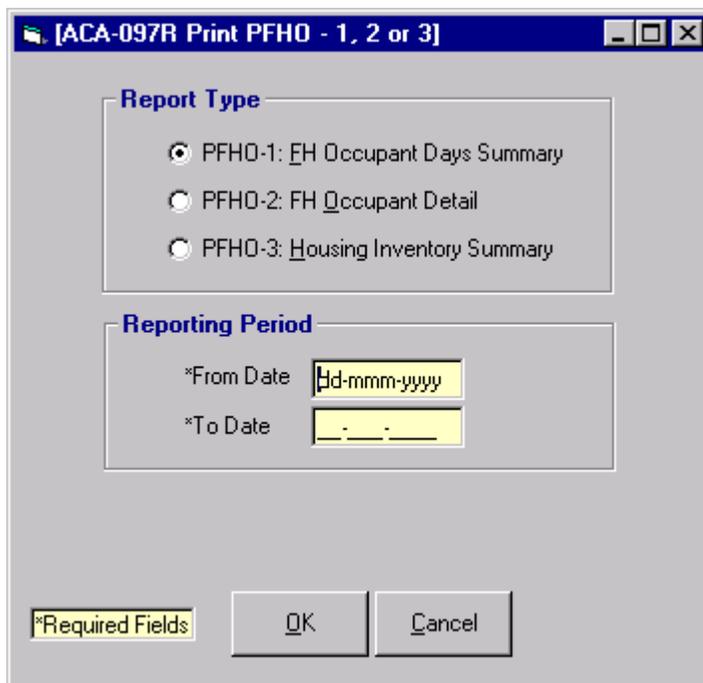

Provide a Report Similar to BOP1 for Privatized (RCI) Housing (ECP-526)

NOTE: This change is only applicable to sites that have “privatized” and continue to use HOMES.

The reports similar to BOP are located on the same screen as the BOP reports (ACA-090R Summary Report List).

Highlight the selection, “**PFHO – 1, 2 or 3**”, and then select the **OK** button.

This is the new screen ACA-097R **Print PFHO – 1, 2 or 3**

The date format for the BOP reports applies to the PFHO reports and just as BOP 3 is based on the “**As of Date**”, so is the PFHO 3 report.

The report similar to BOP1 is named PFHO 1, “**Privatized Family Housing Occupant Days Summary**”). The intent of this report is to show every customer housed in “privatized” (RCI) housing. It does not exclude certain customers as the BOP1 (for example, BOP1 excluded Non-BOP customers).

The information is sorted by:

- Army W/Dep (With Dependent)
- Army WO/Dep (Without Dependent)
- Non-Army W/Dep (With Dependent)
- Non-Army WO/Dep (Without Dependent)
- Fair Market Civilians

NOTE: The “headers” for **Army WO/Dep**, **Non-Army WO/Dep**, and **Fair Market Civilians** will not appear on the report when you have no customers matching this criteria. The “without dependent” information is applicable when a UPH customer is housed in privatized family housing.

TRAINING ISSUES

If civilians are housed as “fair market rental”, the fair market rental information must be present on the ACA-422 AFH Dwelling Unit Maintenance screen before the civilian is assigned to the dwelling. (See screen example next page)

If a civilian is housed as “Rental Type” **HA** (Housing Allowance), they are included in the “Non-Army” portion of the report.

When two civilians with the same identical pay grade are housed as “fair market rental”, each one will appear as separate entries on the report when the “fair market rental” monthly dollar amount is different.

Example - The monthly “fair market rental” amount for a three bedroom dwelling unit is \$1000.00 a month and a four bedroom is \$1,200.00 a month. When this happens, each civilian pay grade is recorded as a separate entry on the PFHO1 report.

The column “**Daily Rate**” is based on whether the “**BAH Type**” on the ACA-201 **Customer Housing Application** screen has been recorded as “**WI**” (With Dependent) or “**WO**” (Without Dependent). (**NOTE:** This information is recorded on the PFHO 2 report. Only UPH customers housed in family housing should be recorded as a “**BAH Type**” of “**WO**”. If you find a customer with a family and his or her “**BAH Type**” has been recorded as “**WO**”, you need to go to the customer’s application record and change it to “**WI**”. Otherwise, the “**Daily Rate**” and “**Total**” will not be computed correctly.

Total Available Days:	180		
Percent Occupancy:	96.11%		

***** END OF REPORT *****

In the screen example above, the section entitled, “**Army WO/Dep**”, only displays if you have customers assigned receiving BAH at the “without dependent” rate. If none are present, this section header will not print on the report. A good example of this scenario is under the “**Non-Army**” section. There are no customers currently assigned matching “**Non-Army WO/Dep**”, so this section is not present on the report.

This scenario is also applicable to “**Non-Army Civilian (Fair Market Rental)**”. When no “fair market civilians” are currently housed, the header will not display on the report.

NOTE: The formula for determining the “**Daily Rate**” for “**Fair Market Civilians**” is as follows:

Multiply the monthly fair market amount by twelve, take the result and divide it by 365. (Example – The “fair market” monthly rental rate is \$1200.00. Multiply this figure by 12 and you get \$14,400.00. Divide this by 365 and you get \$39.45

All other “**Daily Rates**” are computed in the same manner used by BOP based on whether BAH is at the “with dependent” or “without dependent” rate. Multiply the “**Daily Rate**” figure by the figure shown for “**Occupied Days**” to arrive at the “**Total**” figure.

Provide a Report Similar to BOP2 for Privatized (RCI) Housing (ECP-527)

NOTE: This change is only applicable to sites that have “privatized” and continue to use HOMES. See the previous section that addressed the PFHO 1 report on how to access the PFHO 2 report.

The report is similar to BOP2 and named PFHO 2, “**Privatized Family Housing Occupant Detail**”. The intent of this report is to show every customer housed in “privatized” (RCI) housing. It does not exclude certain customers as the BOP2 (for example, BOP2 excluded Non-BOP customers).

The report sorts customers housed by “**Army**” and “**Non-Army**”.

New report added in version 12.02 for installations that have “privatized” and continue to use HOMES

FOR OFFICIAL USE ONLY - PRIVACY ACT DATA

The above is a screen example of the report showing customers broken down as “**Army**” and “**Non-Army**”.

NOTE: The names used for this example were created to better illustrate how various customers are recorded on this report.

There is a column entitled, “**BAH Type**”, on the PFHO 2 report that is not present on the BOP 2 report. The basis for this new field is you need to know if the “**Daily Rate**” amount represents

REQUIREMENTS ISSUE

Foreign military personnel and Coast Guard personnel are normally considered either “fair market rental” or are billed to “operations and maintenance”. Based on guidance from Peter Gentieu, these customers are to be picked up on the report as “**BAH Type**” and not recorded in the same manner civilians housed as “fair market rental” are recorded on the report.

Any questions regarding the requirements for the PFHO 2 report should be directed to Peter Gentieu.

Provide a Report Similar to BOP3 for Privatized (RCI) Housing (ECP-528)

NOTE: This change is only applicable to sites that have “privatized” and continue to use HOMES. See the section that addressed the PFHO 1 report on how to access the PFHO 3 report.

The report is similar to BOP3 and named PFHO 3, “**Privatized Family Housing Inventory Summary**”. The intent of this report is to show every customer housed in “privatized” (RCI) housing based on their pay grade and the “**Current Use**” construction category code of the facility where housed. It also provides a breakdown of the “privatized” housing inventory (occupied, vacant, total inventory and occupied as designated).

NOTE: BOP3 had sections A, B, C, D, E and F. The PFHO 3 report is only one section since sections B through F are not applicable to “privatized” housing.

The report sorts customers housed by “**Army**” and “**Non-Army**” and gives you a total for each. From these totals, the “**Total Occupied**” figure is derived. It also lists the vacant dwelling units by “**Current Use**” construction category code. The “**Total Inventory**” is the total of the “**Total Occupied**” and “**Vacant**” figures. The section “**Total Inventory Occ As Designated**” give you a breakdown showing by “**Current Use**” construction category code how many dwelling are occupied by customers matching the designation.

(See the next page for an example of this report)

The above is a screen example of the new PFHO 3 report in version 12.02.

REMINDER: The report is only applicable to “privatized” sites continuing to use HOMES.

Reformat Off Post Listing Summary Report So Amenity Information Does not Overlay (ECP-538)

In version 12.01, amenity information would overlay if there were a large amount of amenities assigned to an off-post listing. The report has been re-formatted in version 12.02 to avoid this problem.

MISCELLANEOUS CHANGES

Update the Table, “DL_Military_Pay_Grade”, Within HOMES (ECP-520)

The above mentioned table within HOMES has been updated as follows.

Stored_Cd_Id Military_Rank_Order	Description	Military_Rank_Order	Additional_Order
1	E01	1	E01
2	E02	2	E02
3	E03	3	E03

The dropdown menu choice “**Delivery Schedule**” has been de-activated (“grayed out”) in version 12.02 on the ACA-687C **New Request for Contractor Issue** screen.

In addition to this screen, it has also been de-activated on the following additional screens:

- ACA-687D View Open Requests for Contractor Issue
- ACA-688C New Request for Contractor Turn-in
- ACA-688D View Open Requests for Contractor Turn-in

Add “ARLOC” and “Facility No.” to Database Table (ECP-542)

NOTE: This change has already been implemented as an “interim” change for USARUR sites only. The purpose of this ECP is to now include this interim change as part of the HOMES database. (Previously, this change applied to USAREUR servers only.)

Upgrade to Windows 2000 (ECP-524)

The HOMES application now allows for running **Windows 2000** on workstations. Previously, only **Windows NT** was used.

NOTE: This is applicable to workstations only, not the servers.

Military Equivalencies for Some NAF and Wage Grades is Incorrect (ECP-525)

Within version 12.01, some NAF and Wage Grade pay grades were not linked to the proper military equivalency. This problem is fixed in version 12.02. The following table reflects each NAF and Wage Grade that were incorrect in version 12.01 along with the update made in version 12.02.

NOTE: Because of these changes, the waiting list classification as well as “**Current Occupancy Category**” will change when you update to version 12.02.

Add New Rollup Descriptions to CTA Table (ECP-541)

Based on input from USAREUR, it was requested that certain items be added to the CTA rollup description table. The following new items are now available in version 12.02:

- Bed, Double
- Bed, Single
- Decorative Accessories
- Lamp, Table/Desk
- Mattress, Single
- Mirror
- Pad, Mattress
- Table, Night
- Table, Dining
- Table, Square
- Wardrobe
- Video Recorder
- Entertainment Unit
- Shampooer

NOTE: No rollup descriptions have been deleted, only new items added. To update any existing item, establish an applicable item description or descriptions, as applicable, and then use the Admin Adjustment function.

Section 508 Remediation (ECP-543)

Section 508 is a federal requirement that all government web sites and computer applications allow access by handicap individuals and be able to navigate using the keyboard in lieu of using a mouse.
